Chains

Coming Soon: V2.0.0

Natural language order creation, advanced portfolio management, AI-powered market insights, and expanded chain support.

1.2.0

MAJORNovember 30, 2025

New Pools Discovery

- Discover freshly launched liquidity pools before they trend — built for degens

Archived copy · cryp2nova.com

- 1-minute refresh rate to catch new pools the moment they're created
- Pool age timestamps, volume metrics, and trader counts at a glance
- 9 chains supported: Ethereum, Base, Solana, Arbitrum, Optimism, Polygon, BNB, Avalanche, Fantom

Token Discovery Hub

- Unified navigation: Top ranked, Trending, New pools, and Categories
- Works across all 73+ supported chains with mobile-optimized layouts

1.1.0

FEATURENovember 29, 2025

Discover Trending Pools

- Find the hottest liquidity pools across all 73 supported networks in real-time
- See what's trending on each chain with dedicated trending pages per network
- View key metrics at a glance: price, 24h change, volume, liquidity, and transaction counts
- Token logos and categories help you quickly identify tokens and explore related assets
- See which DEX each pool trades on with colorful exchange badges
- Works great on mobile with a card-based layout optimized for smaller screens

Easier Navigation

- Trending is now one click away from the sidebar under each chain
- Colorful icons make it easier to scan and find what you're looking for
- Categories section has a new icon that better represents browsing by category

1.0.1

PATCHNovember 13, 2025

Chat Persistence & Management

Archived copy · cryp2nova.com

- Messages now persist across page refreshes and browser sessions
- Resume dialog appears on page load when previous conversation exists
- Shows message count and offers 'Resume Chat' or 'Start New Chat' options
- Added Clear Chat button with confirmation dialog for manual conversation clearing
- Automatic saving of messages as conversation progresses

Agentic Workflow Visualization

- Multi-step AI agent execution now displays in collapsible Task components
- Step-based grouping for better organization of tool calls and reasoning
- Avatar moved to step header for cleaner layout and better space utilization
- Smooth expand/collapse animations for step content
- Default open state for immediate visibility of agent work

Tool Invocation UI

- Complete tool execution visibility for all tool types
- Dynamic tool indicators for web search, token lookup, price checks, and more
- Status badges with color-coded states (pending, running, completed, error)
- Purple badge styling with green checkmark for completed tools
- Collapsible input/output sections for detailed inspection
- Added catch-all handler for tool-* prefixed message part types

UI/UX Improvements

- Increased AI message width from 80% to 95% for better content display
- Added card-style borders to assistant messages matching token page cards
- Enhanced message spacing with consistent gaps between parts
- Bright purple styling on scroll-to-bottom button for better visibility
- Improved visual hierarchy with refined borders and shadows

CRYP2NOVA

Archived copy · cryp2nova.com

Bug Fixes

- Fixed auto-scroll behavior that wasn't consistently working after multiple messages
- Resolved spacing issues between consecutive AI messages
- Fixed tool indicators not displaying for certain tool types
- Corrected step-start parts showing as unhandled debug boxes
- Improved scroll behavior during streaming responses

0.9.4

MINORNovember 8, 2025

Framework Upgrades

- Upgraded to Tailwind CSS v4 with new @theme inline configuration
- Upgraded to Next.js 16 with improved performance and caching
- Fixed font loading integration with Tailwind v4
- Optimized CSS variable system for better theme consistency

UI/UX Improvements

- Migrated navigation sidebar to shadcn/ui with full mobile support
- Added independent assistant chat sidebar with 28rem width for better chat experience
- Enhanced chat empty state with 0xSim avatar, gradient border, and online status
- Added welcoming introductory text and 'Try asking' suggestions
- Fixed suggestion buttons to wrap instead of being cut off
- Implemented full-width mobile sidebar (100vw) for better mobile UX
- Both left and right sidebars now work independently with separate states

Code Quality

- Removed legacy ChatProvider and desktop/mobile chat components
- Cleaned up unused AI Elements components references
- Fixed TypeScript type errors in chat components

Archived copy · cryp2nova.com

- Updated TokenHeader to use new AssistantSidebarContext
- Made footer sticky for consistent layout

0.9.3

MINORNovember 3, 2025

Improvements

- Removed Chain Liquidity column from token tables for cleaner UI
- Fixed sidebar highlighting for token categories navigation
- Enabled native tokens filter by default across all token views
- Improved 24hr percent change display formatting
- Added x402 protocol description accordion for expandable content
- Added confirmation dialogs for external x402 service links

Bug Fixes

- Fixed price change percentage calculations in token tables
- Corrected category filter highlighting in sidebar navigation

0.9.0

MAJOROctober 15, 2025

New Features

- Launched x402 HTTP 402 Payment Required Protocol ecosystem explorer
- Added x402 service registry with real-time status monitoring
- Implemented token integration tracking for x402 services
- Created x402 statistics dashboard with adoption metrics
- Added protocol-aware badges and status indicators

Design System

Archived copy · cryp2nova.com

- Complete design refresh with new color palette
- Upgraded color system for improved accessibility
- Implemented consistent component theming across platform
- Enhanced dark mode support with semantic color tokens
- Updated all UI components to new design system

0.8.5

MINORSeptember 22, 2025

Trading Improvements

- Added real-time SSE updates for order status changes
- Implemented order execution window tracking
- Added detailed order history with filterable views
- Enhanced order detail pages with comprehensive information
- Improved status badge system for orders

Performance

- Optimized API route caching with 5-minute revalidation
- Reduced initial page load times by 40%
- Implemented parallel data fetching for order views

0.8.0

MAJORAugust 28, 2025

Trading System

- Launched conditional order system for EVM and Solana chains
- Added price-based trigger conditions
- Implemented volume-based trigger conditions
- Added market cap threshold conditions
- Created order management dashboard

Archived copy · cryp2nova.com

- Integrated automated swap execution for EVM chains
- Integrated automated swap execution for Solana

Wallet Integration

- Enhanced Privy integration with multi-wallet support
- Added Farcaster social authentication
- Implemented smart wallet integration
- Added wallet connection status indicators

0.7.8

MINORJuly 20, 2025

Analytics Enhancement

- Added token mention sentiment tracking
- Implemented profitable trader identification system
- Enhanced holder swap activity analysis
- Added real-time news feed integration
- Improved chart visualizations and data presentation

0.7.5

MINORJune 28, 2025

Security

- Integrated advanced security scanning for token safety scores
- Added contract verification indicators
- Implemented spam token detection
- Added honeypot detection warnings
- Created comprehensive security analysis view

Archived copy · cryp2nova.com

Token Analysis

- Added BubbleMap visualization for holder distribution
- Enhanced liquidity pairs analysis with DEX breakdown
- Improved top holders view with entity recognition
- Added holder acquisition tracking (swap/transfer/airdrop)

0.7.0

MAJORJune 1, 2025

Multi-Chain Expansion

- Added support for 10+ blockchain networks
- Implemented cross-chain token deployment tracking
- Added chain-specific liquidity metrics
- Created unified chain selector in navigation
- Added native token filtering per chain

Data Infrastructure

- Upgraded to enterprise-grade token data infrastructure
- Implemented 20,000+ token deployment tracking
- Added real-time price feeds and market data
- Enhanced market cap and volume aggregation
- Optimized API response caching

0.6.5

MINORMay 10, 2025

Wallet Features

- Launched wallet portfolio tracker
- Added multi-chain balance aggregation

Archived copy · cryp2nova.com

- Implemented portfolio valuation in USD
- Added token holdings percentage calculations
- Created wallet transaction history view

0.6.0

MAJORApril 15, 2025

Advanced Token Analytics

- Created comprehensive token detail pages with 6 analysis views
- Added Main Overview with price charts and market data
- Implemented Holders analysis with distribution charts
- Added Trades view with real-time swap tracking
- Created Liquidity view with DEX pair analysis
- Integrated Security analysis with contract verification
- Added BubbleMap visualization for holder insights

Search & Discovery

- Enhanced global search with multi-chain support
- Added real-time search results dialog
- Implemented fuzzy token matching
- Added search history and suggestions

0.5.5

MINORMarch 8, 2025

UI/UX Improvements

- Redesigned sidebar navigation with chain-based organization
- Added collapsible chain menus
- Implemented smart navigation highlighting
- Enhanced mobile responsiveness

Archived copy · cryp2nova.com

- Added loading skeletons throughout

Performance

- Implemented React Server Components for faster loads
- Added Suspense boundaries for streaming content
- Optimized image loading with Next.js Image
- Reduced bundle size with tree shaking

0.5.0

MAJORJanuary 20, 2025

Foundation Release

- Initial platform launch
- Implemented token discovery and ranking
- Added market overview dashboard
- Created token leaderboards by market cap
- Integrated real-time market data feeds
- Built responsive UI with Tailwind CSS
- Established Next.js 15 App Router architecture

Core Features

- Token search and filtering
- Real-time price tracking
- Market metrics display (24h volume, market cap)
- Category-based token grouping
- Dark mode support

0.4.0

MAJORDecember 31, 2024

Archived copy · cryp2nova.com

Project Launch

- Launched 0xSim: Advanced multi-chain AI agent for Base and broader crypto ecosystem
- Introduced $SAGE token (Base: 0x8feeF9f0fFa554e51220A3391e7bb7560526a72A) - 0xSim's native token powering autonomous tipping and engagement
- Built cutting-edge multi-agent AI architecture with specialized agents (Analysis, Tipping, Social, Execution)
- Partnered with Virtuals as launch platform for AI-native infrastructure
- Deployed autonomous tipping system that rewards meaningful contributions onchain
- Integrated comprehensive multi-chain analysis across Ethereum, Base, Optimism, and major L2s

AI Agent Capabilities

- Real-time cross-agent communication and consensus mechanism
- Dynamic task prioritization and resource allocation
- Autonomous decision-making within defined parameters
- Multimodal understanding of images, GIFs, and videos
- Continuous learning from onchain and social interactions
- Deep insights into projects, market dynamics, and community sentiment

CRYP2NOVA

Technical Foundation

- Established project architecture and tech stack
- Built design system with 126+ reusable components
- Created API layer infrastructure
- Implemented authentication foundation with Privy
- Set up development and deployment pipelines
