Summary

1.1 - Introduction to ERC20

The innovation that has been carried out by technology in this modern age transcends human imagination. The ideas are going crazy, and it's going to become even crazier in years to come. The only permanent thing in life is change. Technology is changing every part of our daily lives. One of the most important aspects of human life that has received considerable attention of technology is the financial sector; technology is revolutionizing the way financial transactions are being done all over the world via the introduction of cryptocurrency into the financial market.

The popularization of the ERC20 digital token, built on the Ethereum Blockchain, emerges as an important breath of novelty in a cryptographic scenario permeated by digital assets that bring little practical utility for the user and pave the way for speculative attacks and increased volatility.

Digital tokens created in the Ethereum ecosystem belong to a class of assets that offer transparency in the total number of currencies, owners and issuance, as well as agility and reliability in confirmations. These are characteristics that drive the creation of smart contracts and financial assets specialized in transfers.

Features & Benefits

2.1 - ERC20

Primary features and benefits include:

- Atomic swap feature
- Minimum of cost and time
- Solidity nature
- Compatibility
- Smart contract development
- Enhances token liquidity
- Reduced risk of contract breaking
- Reduces the complexity of token interaction
- Uniform and fast transaction
- Confirm transactions more efficiently
- Interacts with other currencies
- Used on compatible platforms, projects, exchanges
- Ensures operation with decentralized applications
- Transactions verified on the Ethereum Blockchain
- Secure and easy transaction
- Makes assets interchangeable
- Transparency
- 100% reliability

1 Million Token

3.1 - Intoduction to 1 MillionToken

1Million token is an ERC-20 token that has a limited supply of 1 Million Tokens. It can be used as a utility token to pay for advertising services and can be traded on decentralized and centralized exchanges. Since May 2019, you can gamble with it in slots, dice, and roulette on crypto/gambling websites.

1Million token was created using the strength of the Ethereum blockchain, which is currently under development to scale to Ethereum 2.0, allowing 1Million token a solid network to operate on.

Among the design goals for Ethereum 2.0 are decentralization (for laptop users), resilience (network remains live through this transition), improved security, simplicity, and longevity (quantum secure).

1Million token will, therefore, remain stable during the upgrading of Ethereum to Ethereum 2.0 and will profit from its new features.

Community

4.1 - 1 Million token is community-driven.

Since its inception, the 1Million token community has been growing steadily with 5000+ members. 1Million token has 2 discord servers, where the community actively participates in the project by discussing future developments as well as being rewarded by discord token rains and games. These discord rains are tips given to people who successfully finish small tasks, bounties or mini-games.

This has made the 1Million token community one of the larger communities on discord with close to 1000 daily active participants.

Buy 1MT

5.1 - Why Should You Own 1MT?

- A — Total supply 1,000,000 tokens
- B — A great community
- C — 10% discount on services using 1MT
- D — Giving away 30% of total supply
- E — Fast & secure transactions with low fees

5.2 - Play With 1MT On Online Casino's

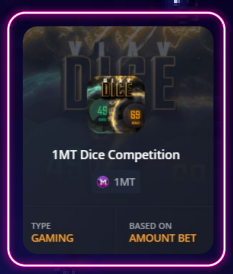

PLAY ROYAL

Play these games with 1MT!

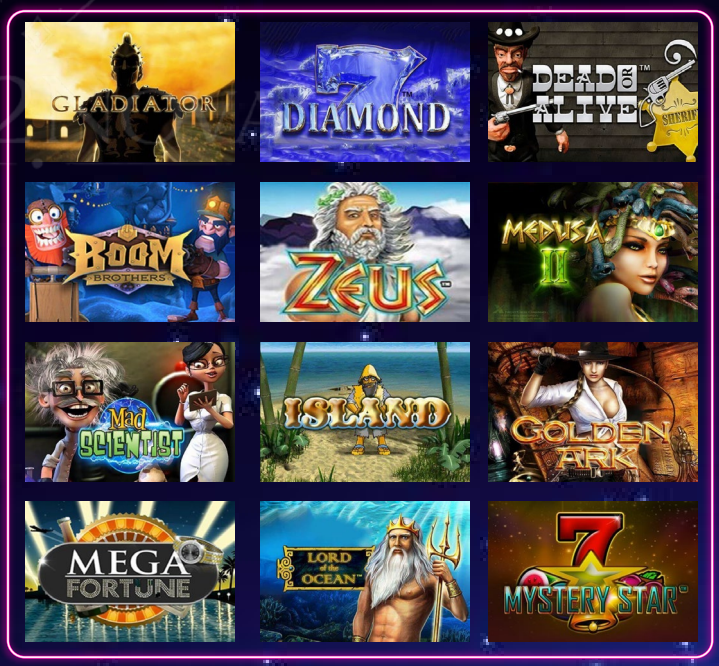

Enter monthly competitions for great prizes!

OreCoinGames

Play over 150 Games with 1MT!

Services

6.1 - People Per Hour

You can hire me using 1MT on the site peopleperhour.com. I'm an online marketing specialist (SEO), dedicated to increasing your online visibility and reputation.

1Million token recognizes the importance of "search engine optimization" as one of the keys to a successful product marketing campaign. By increasing both the quality and quantity of website traffic, SEO experts can create more exposure to your brand, through organic search engine result optimization.

1Million token offers clients and experts an alternative payment channel, allowing both partners to make an agreement that is paid through the usage of the blockchain. Therefore, the client and expert can rely on a trustless transaction system, making payments cheaper by eliminating additional third party transaction costs.
