Welcome to 4EVERLAND

We are delighted to have you here with us. Let us explore and discover new insights about Web3 development through 4EVERLAND!

CRYP2NOVA

What is 4EVERLAND?

4EVERLAND is a Web3 AI cloud platform that integrates storage, computing, and network core capabilities.

4EVERLAND is committed to providing a distributed, highly efficient, self-motivated, and low-cost data hosting gateway that hopes to help the internet to make a smooth leap from Web 2.0 to Web 3.0, and become the infrastructure for millions of Web 3.0 developers and applications.

Everyone Can Start for FREE

To begin your journey with 4EVERLAND, simply log in↗ to our platform and create a free account to enjoy free resources.

Dweb Hosting

- **Scalable, Secure, and Efficient Decentralized Hosting Solution**: Effortlessly build, deploy, and host decentralized websites and apps on IPFS. Arweave, Dfinity, or BNB Greenfield in seconds.

Storage

- **Effortlessly Upload & Pin Files to IPFS and Arweave**: Use our UI, CLI, or SDK to easily decentralize your files. Our built-in pinning orchestration makes the process of uploading and pinning files to IPFS and Amweave seamless.

Gateway

- **Enhanced Speed, Reliability, and Automatic Resource Allocation**: The 4EVERLAND gateway leverages globally distributed nodes to facilitate seamless access to decentralized networks like IPFS, Arweave, Dfinity, and BNB Greenfield.

RPC

Archived copy · cryp2nova.com

- **High-Speed, Reliable, and Cost- Effective Blockchain Node Access**: 4EVERLAND RPC offers high-speed, reliable remote procedure call (RPC) services for seamless interaction with diverse blockchain networks.

RaaS

- **Customizable Rollup Solutions for Enhanced Blockchain Scalability**: Customize your Layer2 blockchain with 4EVERLAND Rollup as a Service(RaaS).

AI Solution

- **A Streamlined Interface to Leverage Diverse Large Language Models**: A unified interface for 100+ LLMs, enabling to explore, compare, and selectmodels and pricing options tailored to your specific needs.
