Welcome early AAAI adopter

AAAI_agent ↗ is a reinforcement learning ↗ agent that continuously streams live data from the largest centralized crypto derivative exchanges (CEX), and uses proprietary anomaly detection algorithms to monitor abnormal market activities, identify and classify irregular patterns and behaviors.

When an anomaly is detected, the agent generates real-time alerts on x.com, ensuring that traders and stakeholders are immediately informed of potential market shifts.

AAAI_agent's performance and accuracy are dynamically enhanced through adaptive learning, as it evolves based on feedback and engagement from its social media interactions.
