👋What is ApeBond?

ApeBond is a decentralized platform where users can buy tokens at a discount that vest over time, while projects build long-term liquidity and strengthen their treasury.

In other words: **ApeBond is a Decentralized OTC Marketplace.**

At the heart of ApeBond is the **Bonds** product. Bonds allow users to buy tokens from our partner projects at a discounted price. In return, users agree to a vesting period —usually between 14 to 60 days— during which the tokens are gradually unlocked. Users can claim as they earn, or wait until the full vesting period is over to redeem all tokens at once.

CRYP2NOVA

This model benefits both users and projects:

- Users get access to discounted tokens from emerging and well-established projects.
- Partners can raise funds and build long-term liquidity without the volatility of immediate token sales.

What can you do on ApeBond, as a user?

🛍️ **Buy Bonds:** Acquire tokens at a discount compared to market price and explore exciting new Web3 projects. Enjoy early access, maximize gains, and join innovative ecosystems with offers available across 14 chains.
💰 **Earn More:** Lock our utility token **ABOND** to unlock Extra Discounts for Bonds and earn **USDT** in our **True Yield** ↗ staking page.
🔁 **Swap Tokens:** Use our multi-chain DEX aggregator to Swap tokens across different networks.

ApeBond helps Web3 projects scale by offering:

💸 **Fundraising via Bonds:** Sell tokens with a vesting schedule in exchange for stables or blue-chips.
💧 **Liquidity Growth:** Raise protocol-owned liquidity by bonding tokens in exchange for LP tokens.
🤝 **Advisory and Co-Marketing:** Work with our team to fine-tune strategy and expand your user base.
🌐 **Ecosystem Network:** Connect with other protocols, partners, and opportunities through ApeBond.

For more information, visit our Partners ↗ page.

Whether you're a DeFi newcomer or a crypto native, ApeBond provides accessible tools to participate in on-chain opportunities — securely, transparently, and across multiple chains.
