AI Agent Layer

The AI Agent Layer introduces a pioneering platform that allows users to create, personalize, and tokenize AI Agents in a fully decentralized ecosystem. Through a seamless and accessible interface, users can launch tradeable AI Agents in just 15 seconds, each represented by tokens paired with the native currency, $AIFUN.

By transforming social media personas and data-driven insights into customizable AI agents, AI Agent Layer brings a new paradigm to digital identity, social media engagement, and DeFi. With its unique blend of automated token generation, liquidity mechanics, and a robust marketplace, AI Agent Layer empowers individuals to engage with audiences and participate in a vibrant social-to-AI economy.

This whitepaper provides a comprehensive look at the platform’s features, vision, and strategy, detailing how AI Agent Layer aims to redefine digital interactions through tokenized AI innovation.
