✨Our Mission

Bringing together everyone for the greater good

Our ultimate objective is to democratize currency by removing the grip of monopolies and returning control to the people. However, this can only be achieved if the community unites for the common good of all humanity. This goal lies at the heart of the AIShiba mission.

In the short term, our priority is to create substantial utility for early supporters of the project and first-mover holders of the AI Shiba OG Collection and $ARB drop. We are confident that as the community increasingly embraces $SHIBAI, we can bring more people together and ultimately achieve our vision of empowering individuals through decentralized currency.

Our Values

The phrase "*Unus pro omnibus, omnes pro uno*" (One for all, all for one) represents the idea that we can only reach our full potential as a society when we work together towards a common objective. We firmly believe that there is power in numbers, and that by uniting around a shared goal, we can achieve great things. Interestingly, this is also the unofficial motto of Switzerland, which we think is pretty cool.

Transparency is a significant advantage of decentralization, as it enables all information to be public and accessible. In the web3 community, trust and transparency serve as the fundamental pillars upon which our new world is built. We recognize that building a strong community requires fostering trust and transparency, and we are committed to doing so as we work towards our shared objectives.
