What is AKEDO

AKEDO is a Multi-Agent AI framework built for Autonomous Content Creation and Intelligent Collaboration. It **empowers creators to design engaging games in just 2 minutes** using simple natural language prompts.

Powered by large language models (LLMs), AKEDO’s modular framework is designed for scalability and flexibility, enabling creators to turn their ideas into reality with ease.

CRYP2NOVA

At the heart of AKEDO's innovation are its **4+ specialized AI agents:**

- World Builders: Create maps.
- Rule Designers: Define game mechanics.
- Balancers: Adjust gameplay fairness.
- Storytellers: Craft narratives.

AKEDO offers multiple opportunities for creators to **monetize their work:**

- Advertiser-Related Games: Create games featuring advertisers’ branded content—and earn ad revenue based on clicks.

- Protocol Revenue Sharing: A portion of the AKEDO's protocol revenue is allocated to reward and incentivize creators.
- Platform Advertising Revenue: Creators receive a share of the AKEDO's ad earnings.
- $AKE Incentives: AKEDO rewards creators contributing to the platform's growth with $AKE tokens.

AKEDO Vision

Our vision is to enable 3 billion gamers to be able to become creators. We aim to curate a diverse range of first-party and third-party contents, creating a vibrant and engaging environment for gamers.

Additionally, we are committed to providing robust content and assetization tools to empower game developers, akin to the innovative approach pioneered by pump.fun. These tools will enable content monetization through tokens, facilitating commercial opportunities for creators. From this perspective, AKEDO will differentiate itself from traditional UGC platform by fostering greater liquidity, incentivizing players, investors, and developers to profit organically within the ecosystem.

The whitepaper will outline **our feature, strategic roadmap, platform architecture, and economic model**, emphasizing our commitment to driving innovation, fostering a thriving gaming community, and creating a supportive ecosystem for all users.

CRYP2NOVA

Why Crypto?

Most general-purpose LLMs likely scrape surface-level representations of data —information that cannot be organically combined into a functional game.
We pioneered a user-friendly framework that empowers significantly more creators to participate in content generation, producing data inherently unobtainable by generic models.

Above all, we incentivize users who participate in content creation and gameplay through a token-based reward system, establishing a sustainable and fair ecosystem.

AKEDO Team

AKEDO is operated by a team of game veterans, including developers from Tencent Lightspeed Studio and Timi Studio. With their rich experience in game developing and publishing, AKEDO will be sure to include all exiciting games and trending gameplays.

AKEDO team has a proven track record in gaming development and publishing with a series of games that have reached over 100 million users and generated billions of revenue, including PUBG Mobile, Cross Fire, APEX Mobile, and series of casual games. Our experience allows us to deliver a seamless gaming experience to our users.

AI Applications is at a pivotal moment, and we see enormous potential for the future. Our approach is to use entertaining and accessible games as a powerful trigger to draw in mass players and introduce them to be creators.
