AN INTRODUCTION

**"I did then what I knew how to do.
Now that I know better, I do better."**

Maya Angelou

The Omikami project was started with the goal of demonstrating that a community without financial resources can come together and create something sustainable that is not controlled by a central authority, similar to what was achieved by projects like Shiba Inu and Dogecoin. The project began with the question of whether a cryptocurrency could be fully operated by its community. This aim of decentralization goes beyond just the economic aspect, and includes the creation of a decentralized internal structure. The project's founders describe it as an "experiment in decentralized spontaneous community building."

The Omikami Ecosystem is an attempt to move away from traditional financial structures and mindsets, in order to find new, creative solutions to problems and better ways of interacting within a community. When success depends on the collective effort of many, it is important to shift perspective and align with the people around us.

The community-driven nature of the project is seen as a future wildnerness, and it is important to note that holding a community together is a complex endeavor that involves many interconnected moments and factors. The team behind the project has learned that true strength is found in a team of people working together, and this understanding led to the development of the Omikami Ecosystem.

"I must not fear. Fear is the mind-killer. Fear is the little-death that brings total obliteration. I will face my fear. I will permit it to pass over me and through me. And when it has gone past I will turn the inner eye to see its path. Where the fear has gone there will be nothing. Only I will remain."

Frank Herbert, Dune

THE MEANING OF AMATERASU OMIKAMI

"The hardest choices require the strongest wills."

Thanos

Amaterasu Omikami, also known as the "great divinity illuminating heaven," is a central figure in Shintoism, the indigenous religion. She is considered the goddess of the sun and the ruler of the High Celestial Plain, the realm of spirits. The most important Shinto shrine in the world, the Ise Grand Shrine, is dedicated to her.

Amaterasu is seen as the highest manifestation of Kunitokotachi, the all-pervading, transcendent, and immanent spirit of the universe. She was born from the left eye of Izanagi as he purified himself in a river, and later became ruler of the Higher Celestial Plane. According to Shinto legends, her victory over the storm god, Susano-O, secured her position as ruler of the world. The Kojiki, a historical and mythological text compiled in the fifth century.

CRYP2NOVA

Worship of the sun goddess has been a part of the Shinto faith for thousands of years. She is also credited with the invention of rice and wheat cultivation, silkworm breeding, and weaving with a loom. Her most important shrine, the Grand Shrine of Ise, is located in Ise, Mie, in western Honshū.

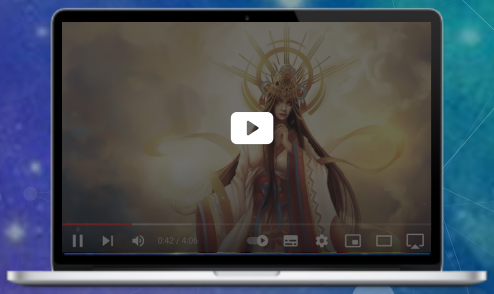

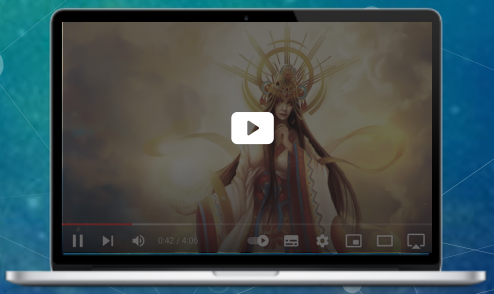

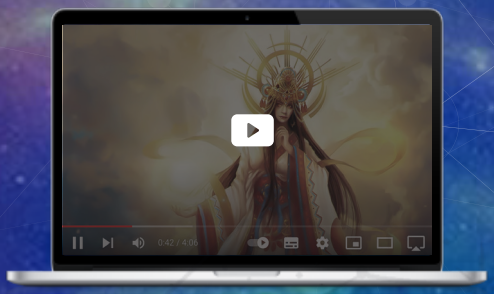

Ise, Mie,
western Honshū

BACKGROUND INFORMATION

In the year 2021, there was a significant increase in the value of memecoins, which led to many investors becoming very wealthy. The goal of Omikami is to replicate this success in the years 2023 and 2024 by creating a new wave of memecoins. The project aims to establish a new memecoin that will be embraced by the community of meme-loving investors, also known as "degens," who are known for holding their investments during tough market conditions and actively promoting their investments during bullish trends.

"He who fears he will suffer, already suffers because he fears."

Michel De Montaigne

The project's unique selling point is the combination of a strong meme community and clearly defined use cases for the token. The belief is that this combination will lead to success, as it marries the aspects of memes and utility. The founder of Omikami believes that the community was created from a unique perspective, by starting from zero and letting the community decide the direction of the currency.

Omikami's community is self-reliant and is looking forward to the future. Starting from scratch and having everyone contribute something is what sets Omikami apart from other projects, and it owes its success to the holders and believers of the token, including holders, administrators, moderators, social media influencers, meme makers, shills, and friends. The founder expresses gratitude for the community's support.

You must be the change you wish to s ee in the world.

Mahatma Gandhi

IT'S ALL ABOUT DECENTRALIZATION HERE!

I asked for strength
and God gave me difficulties to make me strong.

I asked for wisdom
and God gave me problems to learn to solve.

I asked for prosperity
and God gave me a brain and brawn to work.

I asked for courage
and God gave me dangers to overcome.

I asked for love
and God gave me people to help.

I asked for favours
and God gave me opportunities.

I received nothing I wanted.

I received everything I needed.

Archived copy · cryp2nova.com

This is a quote that suggests that when an individual asks for something from a higher power, it may not be given in the way that is expected. Instead, it may be given in the form of something that will ultimately lead to the desired outcome, such as difficulties that lead to strength, problems that lead to wisdom, and obstacles that lead to courage. It also points out that when asking for things, it may not be the thing itself that is given, but the means to achieve it, such as opportunities instead of direct favors. It concludes that in the end, what was received is what was needed, even if it was not what was originally wanted.

Innovation stands at a crossroads.
All of our official structures have been centralized until now. Politics, education, and finance are crafted in a way that lacks an equitable, ethical distribution of power among those functioning within them, and have been for centuries. In the past, this type of internal structure played an important role, but today with the information of the world available at the touch of a button, it's time to rethink. After a surge of customer withdrawals earlier in the month, FTX filed for bankruptcy on Nov. 11, 2022, illustrating how little control the average person has over these overarching, generational structures. Then-CEO Bankman-Fried admitted that the company didn't have sufficient assets in reserve to meet customer demand.

On March 12, 2022, the crypto industry was dealt a major blow when the prices of both Terra Luna (LUNA) and TerraUSD (UST) crashed. LUNA lost over 90 percent of its value in hours, while UST, a "stablecoin" pegged to the U.S. dollar, lost nearly 99 percent

**"Yesterday is history,
tomorrow is a mystery,
today is a gift of God,
which is why we call it the present."**

Bill Keane

Our founder, Nobody, was already implementing his 100% community-based cryptocurrency experiment while all of this was happening.
By its very nature, cryptocurrency goes against traditional processes when it comes to defining wealth and how it can be acquired. However, most cryptocurrencies operate within enforceable rules.

Cryptocurrencies that don't take their independence into their own hands struggle to survive in the ever-changing economic landscape. In the event that the game's rules are changed against them, there is no option for them but to comply, no matter what the consequences may be.
Except for Omikami.

Archived copy · cryp2nova.com

WE WILL ONLY BE USING THE ETHEREUM BLOCKCHAIN

Tomorrow is a mystery. Today is a gift. That's why we call it 'The Present'

Eleanor Roosevelt

You might wonder why we chose ETH when comparing different blockchains. As with the rest of our projects, the answer is straightforward and purposeful. (Shiba, Leash, Bone)

In the beginning, Nobody, our founder, had a predisposition towards ETH. It is already secure and well-established, and it allows us to remain decentralized (unlike some "fad" networks).

His top priority was to ensure that his project could change and evolve without being hindered by outside regulations, and ETH would enable him to achieve that. Our army is able to hold their own tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

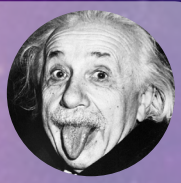

Omikami will be very important to our Defi ecosystem since it will be the governance currency, and it will have important functions when we develop the subsequent products of the Omikami world. In addition to being a store of value and subject to new functions that will be announced later, Omikami will also provide significant passive income (staking, farming, functions).

Archived copy · cryp2nova.com

Our founder locked 100% of the total supply to team finance for almost 3 years, set 0% buy and sell taxes, no presale, no allocated team tokens and since the beginning, the contract has been renounced. Ethereum's most secure dog. It is our aim to flip both Shiba Inu and Dogecoin.
This is what makes ETH the perfect foundation for OmiSwap, a decentralized exchange in the near future where you will be able to trade, buy, sell, HODL, and gain rewards that far outweigh the value of other platforms.

This passage explains why the Omikami project chose to use the Ethereum blockchain as the foundation for their projects. The passage states that the founder, Nobody, had a preference for Ethereum because it is already secure and well-established, and allows for decentralization. They also mention that Omikami will be important to their decentralized finance ecosystem as it will serve as the governance currency and have important functions when they develop other products within the Omikami world. The passage also emphasizes the benefits of using Omikami, such as the ability to hold tokens in a wallet and collect payments from around the world while remaining independent, as well as the potential for significant passive income through staking, farming, and other functions. Additionally, it mentions the founders choice of not doing any presale or allocating team tokens and locking 100% of the total supply to team finance for almost 3 years, which makes it more secure. The passage also suggests that Omikami plans to eventually develop a decentralized exchange, called OmiSwap, that will offer benefits that surpass those of other platforms.

Life is like riding a bicycle.
To keep your balance, you must keep moving.

Community

Cryptocurrency communities are one of the fastest growing. We place a great deal of importance on our community. The Omikami Community is the token. Our community is always involved in all important decisions concerning the Omikami Ecosystem, as we listen to what they have to say. Getting in touch with us is easy. Join our Telegram channel to speak directly with our developer. A team of community managers, moderators, and admins interact daily with our community.

Transparency

Transparency is one of Omikami's core values that creates trust. In order to keep our community and investors informed about our ecosystem, we always strive to be as open as possible. The Omikami team is very professional and has high ambitions. The people on our team have a lot of experience in the crypto space and have been successful in it for a long time. Our goal is to deliver you the best possible project. Through our channels, we communicate directly with our community.

Trust

The importance of trust in cryptocurrency today cannot be overstated. New projects fail most often within their first few months, and those that survive these months often fail within their first year. In an industry where only a few projects survive, our community and investors need to trust us. The team behind Omikami has proven track-records in cryptocurrency and business. Omikami does not have team wallets. We are focused on delivering results for our investors. Our liquidity has been locked in a third-party secured locker for three years, which will be extended annually. To make you feel safe and secure about investing in our project, we do everything we can.

Dedication

It is clear that the Omikami brand will be around for a very long time. It will be the year of Omikami in 2023 and 2024. Launching September 21st, 2022, we have the entire year planned with exciting news and releases. A strong and experienced developer has been working day and night for nothing.

THE OMIKAMI ECOSYSTEM

Be less curious about people and more curious about ideas.

Marie Curie

The Omikami team has planned several products for 2023 and 2024. These will be built on the successful experience of previous projects such as Shib, Bone, and Leash. The goal is to establish Omikami as a valuable utility token in the DeFi space with the help of the community. As the project grows, more products will be added and communicated to the community. The Omikami ecosystem offers advanced DeFi features and its native token, $OMIKAMI, is set to surpass the value of both Shiba Inu and Dogecoin. The ecosystem also appeals to serious investors. In the coming months, Omikami will launch a variety of platforms and features including Kami Burn Bot, OmiAI Bot, Web3, Omiswap, Kami Debit Cards, Omikami Metaverse and P2E games, OmiFi, 3D hand-drawn NFTs, Charity, Staking, Omikami Chain [OMI20], Omikami Wallet, Omikami merch, and Omikami university.

THE OMIKAMI DEVELOPMENT PLAN (UTILITIES)

七転び八起き **(nana korobi ya oki) "Fall seven times, get up eight." "If at first you don't succeed, try and try again." "Don't give up!"**

Japanese proverbs

Kami Burn Bot

Our Burn Bot will show how many tokens are burned with every transaction as they happen. Anyone can burn their tokens by sending them to the dead wallet.

OmiAI Bot

Omikami's AI-based bot will be able to answer questions or make statements, receive an AI-generated response via text, receive an AI-generated image, receive an AI-generated response via speech, and convert text into speech and many more.

Web3

Users will be able to engage with decentralized applications developed on blockchain technology using Omikami's Web3 browsers. The next-generation internet will be open to anyone and provide benefits thanks to Web3 technologies like distributed ledgers, AI, Metaverse, and others.

Omiswap

Omiswap will be a decentralized exchange that will enable peer-to-peer market making. Aggregation, liquidity, perpetual protocols, which are cutting-edge, will fuel our DEX.

Kami Debit Cards

Using Kami crypto debit card, you can access and use your Omikami and some other tokens, like Fiat, anywhere in the world without the need for pre-conversion.

Archived copy · cryp2nova.com

Omikami Metaverse and P2E games

Blockchain-based leveling systems with AI and virtual reality will be available in OMIKAMI's Play-to-Earn Metaverse games.

OmiFi

Innovative digital asset locker protocol powered by the OMIKAMI token.

Charity

Cryptocurrency and blockchain technology are beneficial, but only if they improve our quality of life and the planet as a whole. Because of this, Omikami will place a high priority on charitable giving. Giving to those in need and organizations that work to improve the world is central to Omikami's mission.

Staking

You will be able to stake your OMIKAMI tokens and earn rewards in the upcoming new token launch that's going to be part of the ecosystem.

Omikami Chain [OMI20]

Omikami Chain is a Layer 1 blockchain designed for security, decentralization, and high transaction speed.

CRYP2NOVA

Omikami Wallet

Omikami Wallet is a DeFi Crypto wallet for purchasing, sending, exchanging, and gathering NFTs across many chains. Cross-chain swaps, a Fiat off-ramp, ledger support, contact lists, and many more novel features are being implemented.

3D NFTS

In perpetuity, Omikami NFTs will consist of 10,000 Omikami-generated Non-fungible Tokens (NFTS) on the Ethereum blockchain. Each of these amazing NFTs will have unique traits that make them collectible in essence. Laser Eyes, Party Hats, etc.

ROADMAP

"May the Force be with you." -Star Wars, 1977

Phase 1

- Dextools trending.
- Whitepaper release.
- CoinGecko listing.
- CoinMarketCap listing.
- SOLIDProof audit.
- Press articles.
- Tier 3 CEX listings.
- 3D NFT sneak peaks.
- Kami Burn Bot.
- OmiAI Bot.
- Omikami merch.
- 1-5+ million in market cap.
- Charity events.

CRYP2NOVA

Archived copy · cryp2nova.com

Phase 2

- 3D NFT release.
- Omikami 10-30 mins short movie.
- Tier 2 CEX listings.
- Kami Debit Cards.
- Certik audit.
- Omiswap.
- Website 2.0.
- P2E game development showcase.
- Omikami university.
- Game release on Apple and Play stores.
- 10-50+ million in market cap.
- 5k+ holders.
- Charity events.

CRYP2NOVA

Archived copy · cryp2nova.com

Phase 3

- Omichain (OMI20) layer 1 blockchain.
- Staking platform.
- Metaverse.
- Web 3 integration.
- Omikami Wallet.
- 10k+ holders.
- OmiFi.
- Tier 1 CEX listings.
- Omikami ecosystem is complete.
- Instagram, Twitter, and Telegram are verified.
- Website 3.0.
- 10-25k+ holders.
- More charity events.
- The Dogecoin and the Shiba Inu flipped.

OMIKAMI ARTIST APPRECIATION PROGRAM

The Omikam Incubator Program will collect all amazing arts, images, and pictures into one program

One of the most successful, fully decentralized cryptocurrency experiments in history will be Omikami. Under the right circumstances, talented individuals from all over the world can unite under one banner and use their unique skills to build something remarkable. We can allow these ideas to grow to their full potential in the Omikami Incubator, which is the foundation of the entire project.
Since its inception, Omikami has evolved, and every aspect of it reflects that. We were tasked at Omikami to discover ways to honor ingenuity and individuality beyond popular art forms (painting, photography, digital rendering).

Art can be found in everything. Creativity can be found in every field, profession, and opportunity. There is no reason that those who discover their passions through a more readily recognized medium should be excluded from those who feel most connected with themselves when they solve complex math problems, repair a car, research technology, or heal the sick.

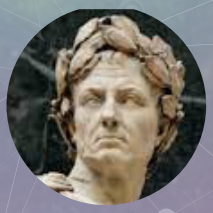

Keeping art in all its forms open and encouraging is the key to Omikami's prosperity.

The Omikami token is based on decentralization, which is the future for more than just finance. The decentralization of power is the revolutionary solution that could restore our autonomy in a world that rarely questions arbitrary rules designed to benefit the wealthy and powerful. Omikami experimenters recognize this as simply another way to help others step outside of preconceived limits and regulations to experience what it's like to be a part of our movement.

Archived copy · cryp2nova.com

THE VISION OF OMISWAP

"Veni, vidi, vici",
"I came, I saw, I conquered."

Julius Caesar

We all know that the limited regulatory oversight of the crypto space, DeFi's biggest strength - decentralization - becomes its biggest weakness.

More than once, we have seen developers pull liquidity immediately after launching a token or trick investors by sending minted tokens to some wallets or removing collected taxes.

The crypto space has significant room for bad actors, and making money without getting punished has never been easier
The biggest threat to DeFi is a lack of trust in any project due to asymmetric information between developers (even those with good intentions) and investors.

Our mission is to build the world's best decentralized ecosystem. Our goal at Omiswap is to provide a safe place to trade your valuable crypto while remaining decentralized. Our loyalty to our holders allows us to grow exponentially. Omiswap's ecosystem will continuously grow to attract ever-increasing interested parties.
Tokenomics, solid design, technical implementation, and viral growth from our good ol' fashion memes will reinforce the platform's strength and ultimately benefit the ecosystem.

Creating a swap without a budget is a unique challenge, but we will be able to build a focused development team from the community by tackling a variety of genres and product lines.

As a unified force, with the power of Omikami, we will succeed in advancing the Swap and Ecosystem as a whole, so that we can reach new and spectacular heights.
It's only the beginning!

Archived copy · cryp2nova.com

CONCLUSION

There was a seed of an idea that led to the creation of the Omikami Community. Without a centralized team, no funding, and no direct leadership, what could happen? Is decentralization actually possible? Instead of perpetuating something that is fully community-driven, could we follow the perfect storm of digital currencies, like BTC or DOGE?

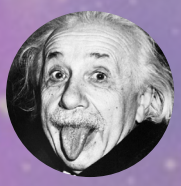

I will remain around to "defend the brand" and protect the community from leeches and scammers, but the volunteer team at Omiswap will build the future of finance.

Decentralized communities are entering a new era. We will employ Omiswap to serve as the crucial point of contact between the decentralized world and global communities when the time is right (because good things cannot be rushed).

I would like to thank each and every one of you again. All of this would not be possible without your participation.
Now is the time to get started.
- Nobody
