# 🔷The Documentation For Anyone

Copy

Anyone is a decentralized communication network built on anonymity, privacy, and global accessibility. Run a relay, develop with our SDK, or simply connect through the network with available tools.

## How to Use the Docs

These docs are the comprehensive overview of how to *use* the Anyone Protocol. It includes guides for operating a relay, connecting to the network, building apps on top of the network and configuring your hardware!

# Who are these Docs for

| You are ... | Start with ... |
| --- | --- |
| Running a relay | Relay Operators |
| Using the Anyone Router | Hardware Users |
| Building with the SDK | Developers |
| Just trying to connect | End Users |
| Interested in security or rewards | Security & Rewards |

# What You Can Do With Anyone

- **Run a privacy-first relay** on your own terms
- **Integrate with Anyone SDK** across platforms
- **Connect to the network** from your favorite apps
- **Earn rewards** by contributing infrastructure
- **Fine-tune** your own secure, decentralized relay setup

Head to Quick Start to jump straight in to the installation and usage for your system
