1: INTRODUCTION

Avante Is crypto token build on Binance Smart Chain. The reason why we build AXT is, (we all know when we buy a product from a store (online or offline). We use Same old traditional payment method like Paypal or bank cards which cost expensive and slow, but when we use cryptocurrency as a payment module it is much cheaper, fast&Secure and also we have a technology name blockchain or Smart chain who stored transections peer-to-peer values so we decided to build a stores network who accepted Avante as a payment and also we replace old traditional payment cash Way, Avante is First Decentralized Crypto Token build his own Stores Network in all over the world.

CRYP2NOVA

2: CONCEPT

Payment system we used from many years, is much more expensive & Slow Because When person A send money to person B or example from one Country to another They used banks which takes too much time fees and old gateway same system in stores

Archived copy · cryp2nova.com

But when we use avante as a payment (its much more cheaper Fast&Secure) we use BSC technology to store transection and we launch our first online store name avante Users can buy product from store using avante , The rising moment of NFT and staking Today we have a great Staking system That our user also earn reward when they using Avante Transection system.

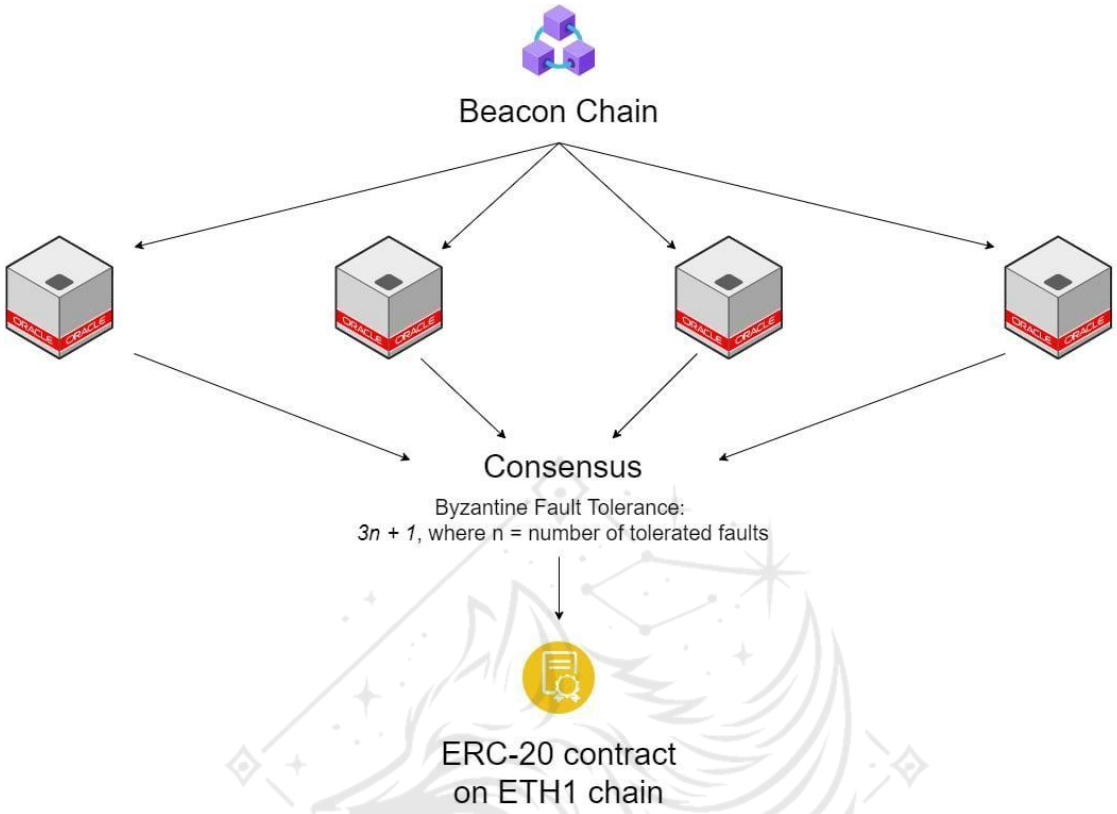

3: Use Cases

3.1: Staking

Crypto staking is when you pledge your cryptocurrency toward helping validate transactions on the blockchain. Usually you won't personally be validating transactions, but computers in the network will, and you can earn good income by staking your crypto.

Archived copy · cryp2nova.com

Users can earn handsome % on staked amount, Staking can boost Users earnings and price. we all understand that we need Extra Source of income so in axt you can simple earn some % monthly ,how the AXT staking works we will share this details Below in Charts

3.2: Affiliate System

Affiliate Marketing is one of best way to boost earnings as a Networker in this digital world.

Marketing is the key of any product to achieve Sales. (example) { marketing is the process by which an affiliate earns a commission for marketing another person's or company's products. The affiliate simply searches for a product they enjoy, then promotes that product and earns a piece of the profit from each sale they make}

Archived copy · cryp2nova.com

in our staking system users can earn 5% Commission when a person activate staking from their Link. With this method we will Staked more avante and also remove price fluctuations in our eco-system. User can earn much more handsome income by marketing

3.3: Replace Traditional payment system

The pandemic has spurred the use of digital payment solutions in our daily lives. Not just businesses, but common consumers use digital payments more than ever to pay bills, send money, shop online and much more.

Digital payments are soon replacing traditional payment methods and for good reason. So, let's ask ourselves-

why stand in long queues to pay your ward's fees when you can pay via from mobile crypto wallet or a link shared through mail, right!

This changing consumer preference is also causing disruptive changes in every business sector, from EdTech to Fintech, all are switching to the easier, quicker, and safer electronic modes of payment Through Avante.

3.4: Using in gaming platforms

Before we dive too deep into gaming tokens, we need to take a look at the current state of gaming and what we do within video games.

Today's games, at least the traditional ones that you can play on your gaming console, will typically allow you to purchase in-game items. Most of the time, these will only serve a cosmetic role, thin along the lines of getting your character a cool new skin for you as well as others to enjoy viewing.

However, there was one fundamental flaw with this system that a lot of gamers realized over time, and this is that once you buy the digital skins or other in-game items, you are stuck with them.

We mean by "stuck" that you cannot really sell them on an open market, and neither in an in-game auction house. They typically cannot be traded, and they cannot leave the game.

This is where blockchain gaming entered the picture.

P2E Avante

When it comes to the main gaming crypto relationship, it is all about games that are P2E which stands for play to earn. So avante will launched his gaming platform in future where you can play games and earn tokens. You can earn token by purchasing skins,guns, other items and by the help of blockchain technology we build a market platform where you can sell your items using Avante Token .

3.5: Build e-commerce Stores

Cryptocurrencies like Bitcoin are becoming increasingly popular. People often buy goods and services with cryptocurrency because it offers an alternative payment method. Businesses can accept crypto payments to reach new customers and increase sales. Our main aim is to build e-commerce stores in all over the world. Our stores only accepted payment in our token. Because the online stores are gaining popularity day after day with the help of e-commerce we add main use case of our crypto because if we observe many major stores

(online&offline) are accepted payments in cryptocurrencies. The use of

Blockchain technology is the most important step of accepted any digital currency. Our token can boost price and build strong network with the help of e-commerce.

3.6: Charity & donations

In this world, imagine how many people are homeless, There are 35 million people in one Asian country have no homes to live. Our project (Avante Foundation) has a goal to build 3 million homes in next 2 years.

4: Token

While it is built on the blockchain ledger of BSC, Avante aims to be independent from other currencies, monetary policies, or technological choices so that we build the most robust system possible. We believe this is the key to evolve through time with a growing community and develop an ecosystem around our framework where more DAPP (Decentralized applications) are created

4.1: Incentive for a secure ecosystem of applications

AXT tokens are BEP20 tokens which are necessary to participate in the network, create advanced network and reward various parties who will help build the Avante ecosystem.

The network will have a built in system to reward platforms on top of the protocol who decide to charge a BSC Fee. In this way we favorize the creation of an entire financial open payment platform.

CRYP2NOVA

4.2: Governance

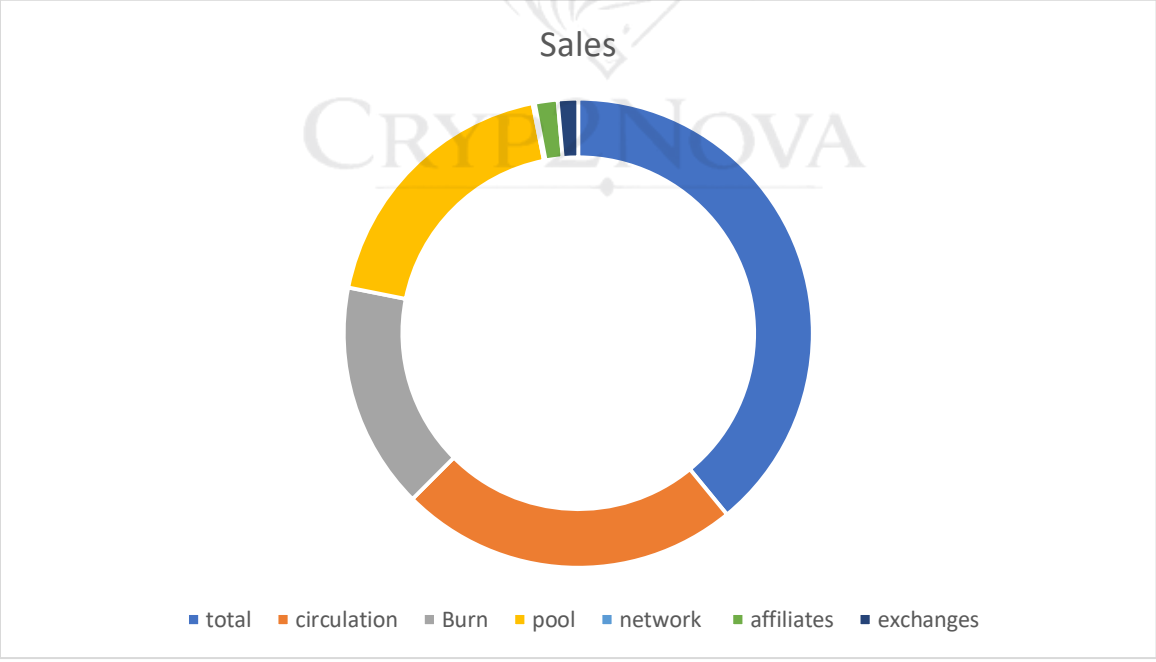

We have a strong desire to build a avante eco-system that lasts tens or even hundreds of years. A system that can not only be used by historians to see what commerce looked like in the 21st century, but also a system that will take us into the future, with the power and structure to be used when artificial machines and intelligence will account for the majority of transactions.

Archived copy · cryp2nova.com

4.3: Independence of other currencies

Payment is terms of currency. We are creating a system that should not be dependent on the monetary policy of another currency. AXT should be as independent as possible from BSC inflation or deflation. The BNB roadmap supports our direction, it is highly likely that miners / stakers will be able to upgrade to Casper to accept other BEP20 tokens as gas, which will be a great simplification. This independence will eventually allow AXT to hard fork to a new system with a new technology by keeping the same token holders ecosystem.

4.4: Distribution of Token

Archived copy · cryp2nova.com

1: Total supply (25 Million tokens)

2: Circulation supply (15 Million tokens)

3: Pool (12 Million tokens)

4: Private 1 (1 Million tokens)

5: Network maintenance (100000 tokens)

6: Affiliate&Commission (1Million tokens)

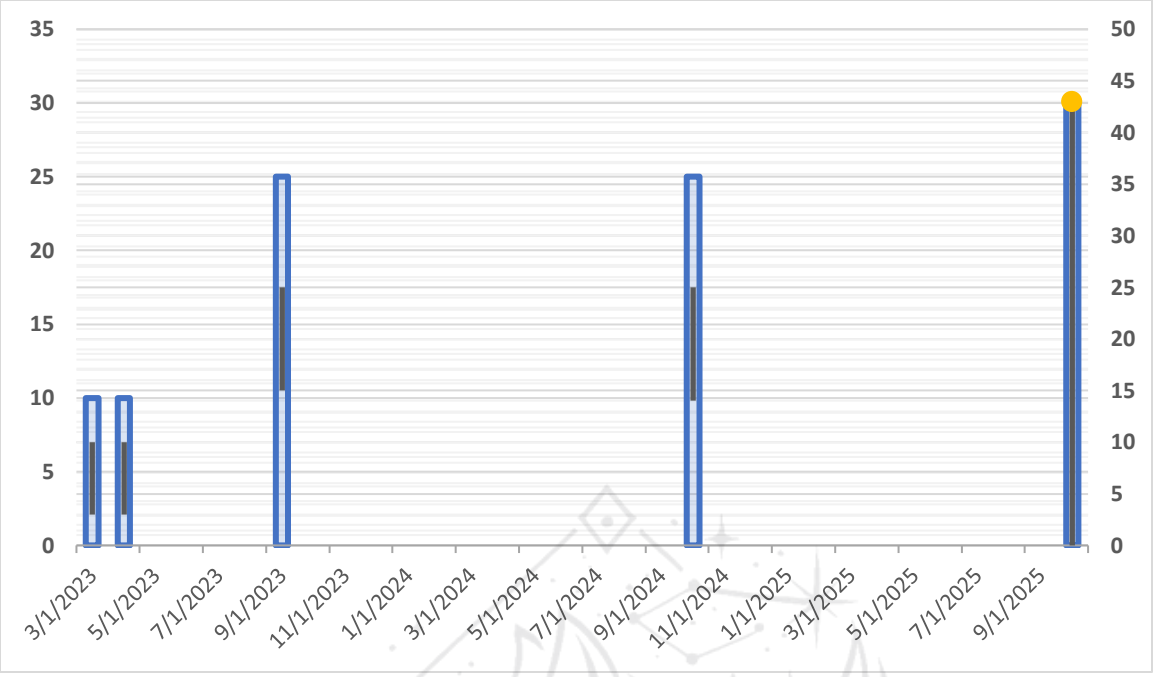

7: For exchanges and listings (900000 tokens)

Other 10 million tokens will be burned (Sent on contract address)

5: Road Map

Archived copy · cryp2nova.com

Date= march /2023

- Build Tokens and Network of 1000 users
- Achieve 1000 Holders

Date= April /2023

- Introduced staking plan
- Prompt Via Digital marketing
- Get more holders
- Achieve daily trading volume 20000$

Archived copy · cryp2nova.com

Date= sep /2023

- Build e-commerce store and test network scalability
- Accepted payment in Avante
- Achieve more than 2000 active stakers
- Staked 1 million tokens

Date= oct /2024

- Introduced mobile wallets
- Adding avante as payment method in world largest stores
- Build own decentralized exchange for users
- Set achievement reward system in staking plans

CRYP2NOVA

Date= Oct /2025

- Achieved 10,000 Active Stakers
- Staked More than 4 million Token
- Build and Run More than 1000 e-commerce Stores
- Apply for listings in exchanges
- Build the network of 5 million Users

Archived copy · cryp2nova.com

- Adding more feature in eco-system

6: Team

Developers

- Muzammil sewag
- Muhammad Shaban-ul-Moazam (Expert in Blockchain Development)
- Logan (Senior Developer)
- Christopher Sam (E-commerce Expert)
- Sabeel-ur-rehman (junior developer)
- Salim Raza (Cryptocurrency Management Services)

Marketing Team

- Nawaz Malik (Network Marketer from 5 years)
- Andrew Martin (Digital marketing Expert)
- Muhammad Bhatti (Google Ads, PPc , Facebook , Campaign)
- Bilal Qureshi (Network Marketer from 8 years)
- Kathren Lois (Digital marketing Expert)
- Munir Umar (Social profile Handler)
- Shiekh Mahmood (System Management Handler)
- Umar Ali (Network Marketer from 2 years)

Thanks, Support Team Avante.
