Abstract

Copy

Tokenomics play a vital role in shaping the dynamics and sustainability of a cryptocurrency ecosystem. The Baby DragonX protocol (token name $BDX), operating within the Ethereum TITAN X ecosystem, leverages innovative mechanisms centered around a fair launch, along with token burns and minting using $TITANX to enhance scarcity, drive demand, and offer unique benefits to participants. This DragonPaper delineates the foundational principles, mechanisms, and strategies employed by Baby DragonX to foster a robust and sustainable token economy within the broader TITAN X framework.

Founder & Chief GetStuffDone Officer: James Croyle doxxed on Linktr.ee ↗

Previous Co-Founder Michael who is doxxed on X ↗ has left the team and we wish him well.

Two audits have been completed prior to launch with all relevant issues remedied, referenced in the Audit section.
