[ANN][BEL] Bells - Fast and fun! - Scrypt - Random Block Rewards - No Premine #1
November 28, 2013, 01:39:17 AM

[BEL] Bells

Scrypt coin based on the currency from the Nintendo game Animal Crossing.

Logo by Daswiruch

In the Animal Crossing universe, Bells are the primary form of currency. To gather them, you must collect fruits, catch bugs, fish, dig for fossils, etc. and trade those items for Bells. In the crypto world, we just mine for them!

The Bell amount you get from the various items is quite random, so Bells as a cryptocurrency has random rewards in various denominations as well.

(Assuming windows 7)
1. In C:\Users\[yourname]\AppData\Roaming\Bells, create the file "bells.conf"
2. In "bells.conf" add

rpcuser=bells
rpcpassword=rock
addnode=199.127.226.129
addnode=162.243.113.110
rpcport=19918
server=1
daemon=1
gen=0

3. Run the Bells-qt client
4. Download GUIMiner-Scrypt http://guiminer.org/guiminer-scrypt.html
5. Start mining with the following options:

Host: http://127.0.0.1
Port: 19918
Username: bells
Password: rock
Use stratum: No
(The rest would be your graphics card defaults)

Is teh pool dead or what?
On payouts page in pool I have 100+ which is nothing compared to my wallet which is like 5 coins.

btw, ppl saying they sell 100k coins when there are 1000 blocks?

Rewards are random. One can get anywhere from 50 to 10k from blocks 101 to 129600.

The payout page is you expected esitmated payout for the block we are trying to solve, not what is on it's way to you. If we find that block that is what you should get. roughly.
