Binance Staked SOL News & Insights All News Recap Bull/Bear Deep Dive Create Your Own Report Last Updated: Feb-4-2026 20:36 UTC Currently Interesting On February 3, 2026, Zenrock launched Hush Protocol, a new privacy layer on Solana inspired by Zcash, which allows for yield-bearing and quantum-proof shielding of assets 1 . This protocol enables users to deposit SOL, which is then automatically converted to jitoSOL, distributing staking yield and Maximal Extractable Value (MEV) rewards passively 1 . The launch of Hush Protocol is significant because it addresses the growing need for advanced privacy layers in decentralized finance (DeFi), real-world assets (RWAs), and artificial intelligence (AI) agents, which are crucial for institutional adoption 1 . This development, alongside other recent privacy-focused launches on Solana, indicates a rising interest in on-chain privacy solutions within the ecosystem 1 . Get Caught Up Binance Addresses October 2025 Liquidation Event Binance recently released a post-mortem report regarding the $19 billion liquidation wave that occurred on October 10, 2025, attributing it primarily to macroeconomic shocks rather than exchange failure 2 . While acknowledging two localized technical issues on its platform, including abnormal index price deviations for USDe, WBETH, and BNSOL, Binance stated that the majority of liquidations happened before these incidents 2 . This event highlights the impact of external market pressures on the crypto ecosystem and Binance's efforts to address platform vulnerabilities under extreme conditions 2 . Bybit's Solana Ecosystem Integration Bybit has established itself as a leading exchange for Solana, implementing a full-stack strategy that includes early token listings, gas-free staking via Byreal, and bbSOL liquid staking 3 4 . This integrated approach has contributed to significant token price increases, such as the SKR breakout, and provides users with opportunities to earn staking rewards while maintaining liquidity 3 4 . Bybit's strategy demonstrates how centralized exchanges are deepening their involvement in specific blockchain ecosystems to attract users and facilitate growth 3 4 . 21Shares Launches Jito Staked SOL ETP in Europe On January 29, 2026, 21Shares announced the launch of the 21Shares Jito Staked SOL ETP (JSOL) on Euronext Amsterdam and Paris, making it the first European exchange-traded product fully backed by JitoSOL, Solana's liquid staking token 5 6 . This ETP provides European investors with regulated access to Solana exposure, allowing them to capture both staking and MEV rewards 5 . This launch is a key part of the Jito Foundation's strategy to enhance institutional access to JitoSOL and signifies the increasing maturity of liquid staking as a global financial instrument 5 . Biggest Stories of 2025 Johnson & Johnson acquired Halda Therapeutics for $3.05 billion, a deal that covered various sectors including crypto (December 30, 2025) 7 . Altcoin trading volumes, including for SOL, reached multi-year lows in December 2025, suggesting a period of consolidation or potential for future outperformance against Bitcoin (December 30, 2025) 8 . Binance opened ETH options writing to all users, expanding access to advanced derivatives tools and upgrading its options platform infrastructure to include ETH, BTC, BNB, and SOL contracts (December 22, 2025) 9 . Solana saw an all-time high of 409 million SOL staked, enhancing network security, though the Solana Foundation cut validator subsidies, reducing active validators (December 25, 2025) 10 . Jito announced the launch of the 21Shares Jito Staked SOL ETP (JSOL), the first European exchange-traded product backed by JitoSOL, offering regulated access to Solana exposure and dual on-chain yield (December 17, 2025) 11 . Binance issued a warning about fraudulent "listing agents" and offered a whistleblower reward of up to $5 million for verifiable evidence (December 17, 2025) 12 . Binance Coin (BNB) and

Solana (SOL) fiercely contested the #3 spot in market capitalization, with BNB showing more stable gains despite SOL's volatile rallies (December 15, 2025) 13 . Binance was criticized for freezing only 17% of stolen Solana (SOL) requested by South Korean police following the late November 2025 Upbit hack, citing a need for further fact-checking (December 12, 2025) 14 . Binance added USD1, a stablecoin from World Liberty Financial, to several spot markets, including against BNB, ETH, and SOL (December 11, 2025) 15 . A whale withdrew 200,001 SOL (worth nearly $28 million) from Binance, indicating aggressive accumulation as Solana consolidated within a defined range (December 11, 2025) 16 . A Solana whale deposited 100,000 SOL ($13.57 million) onto exchanges, contributing to a total of 615,000 SOL moved to Binance since April, potentially signaling selling pressure (December 9, 2025) 17 . Solana (SOL) neared a top-5 market cap position, gaining on Binance Coin (BNB) with a 16.5% ROI in August, driven by U.S. institutional flows and the upcoming Alpenglow upgrade (September 4, 2025) 18 . Liquid Staked SOL reached a record 57 million tokens, representing 13.6% of all staked SOL, with bnSOL (issued by Binance) rapidly growing to $2.3 billion (September 2, 2025) 19 . Solana SOL surged over 20% in September, flipping Binance BNB in market cap to a new all-time high of $130 billion, driven by industry buying ahead of potential SEC approval of spot Solana ETFs (September 13, 2025) 20 . Solv Protocol partnered with Binance to launch BTC staking on Binance Earn, integrating Solv’s institutional-grade Bitcoin yield products into Binance’s On-Chain Yields platform (May 8, 2025) 21 . A whale unstaked 100,000 SOL ($13.9 million) after four years of staking, signaling potential profit-taking, while still holding over 1.19 million SOL (April 22, 2025) 22 . Binance Coin (BNB) overtook Solana (SOL) in market capitalization, reclaiming the fifth-largest cryptocurrency position, driven by a shift in memecoin trends to the BNB Chain (March 29, 2025) 23 . Bybit launched Margin Staked SOL, allowing users to leverage up to 2x for optimized SOL earnings through borrowing and staking, with a net annual percentage rate (APR) over 13% (March 17, 2025) 24 . Binance denied social media claims of dumping large amounts of Ethereum (ETH) and Solana (SOL), clarifying that it only facilitates trades and does not control user trading decisions (February 26, 2025) 25 26 . A whale withdrew and staked 47,154 SOL ($7.98 million) from Binance, contributing to a total of 134,482 SOL ($23.58 million) staked over three days, indicating a shift towards staking among investors (February 21, 2025) 27 . Bybit introduced bbSOL, the first exchange-backed liquid staking token (LST) for Solana, enabling users to earn staking rewards while maintaining liquidity (February 7, 2025) 28 . Solana led the DeFi space with high DEX trading volume, attracting institutional interest, and Binance's bnSOL became the second-largest LST on Solana (January 28, 2025) 29 . The year 2025 saw the successful launch of $SOL ETFs, with REX-Shares' $SSK and Bitwise's $BSOL pioneering market entry, leading to collective AUM exceeding $747 million (December 22, 2025) 30 .
