Bitcoin Plus Whitepaper

Abstract

BitcoinPlus operates on a purely peer-to-peer network, “The XBC Project” and the developers of BitcoinPlus have no power to disable the network or force changes on the network unless those changes are accepted by participants of the network. BitcoinPlus is not a business owned by anyone, it is an autonomous P2P network which will continue to operate on a global scale with or without “The XBC Project”, dependent on active usage and global consensus among the entire XBC community.
