About BitDCA

The BitDCA project, brings a mobile application Littlebit, which represents a new, innovative way of saving into Bitcoin that is easily accessible, attractive, and modern for newcomers and experts alike.

Given its uniqueness and accessibility, the Littlebit application has the potential to rapidly obtain a massive user base on the international market. This attractive solution opens a way to enormous profits in the rapidly expanding cryptocurrency market.

> *“Opening a new way to save in Bitcoin.”*

Quick Overview

- Littlebit application allows users to save predetermined percentage of users’ payments in Bitcoin every time they pay with their current payment cards.

- For our system to be active, it is enough if users behave as usual, i.e. pay by their card at retailers. Each card payment can transform into a Bitcoin investment, based on the rules predefined by the user.
- In the future, the application will offer access to other attractive investment assets, such as more cryptocurrencies, gold, or the S&P 500.
