Bitlight Wallet

The 1st Bitcoin wallet unifying RGB & Lightning Network with uncompromising security

Download on Chrome

RGB

As a member of the LNP/BP Association and a major contributor to the RGB protocol, Bitlight Labs is committed to pioneering native BitcoinFi through the development of native smart contract infrastructure for Bitcoin and Lightning Network.

Lightning Network

Bitlight Labs is a key contributor to the Lightning Network. Based on LDK, we are developing the RGB Lightning Network Node - RLN to enable efficient, low-cost asset transactions and transfers on Bitcoin.

PayFi

Bitlight Labs has developed Bitcoin and stablecoin payment frameworks and applications based on RLN. Lightning Network stablecoins defined by RGB will transform the efficiency of cross-border payments and AI agent settlements, realizing the vision of sixth-generation payments with true real-time settlement.
