Whitepaper 2.0 | Bondex (us EN)

Copy

Preface

The last three years since we launched Bondex have been an extraordinary journey. What began as an experiment to assess the demand for a web3 professional network has evolved into a platform offering several products and services to a wide audience, forming the foundation for our Vision 2.0.

Some of the key milestones include:

- The Bondex App 1.0, launched in July 2023, has reached **5 million downloads**, with an all-time high of 1.5 million active users and **2 million completed profiles.**
- A successful **$6.5 million Coinlist Public Sale** in March 2024, which **broke participation records** and was a critical step towards launching the $BDXN token.
- Our **Job portal,** launched in January 2024, which has been used by leading web3 enterprises including Binance, CoinMarketCap, Rarible and more.

Since our inception, the web3 landscape has evolved in terms of trends, competition, and adoption.

With the experience gained from having active products and a critical mass of users, we are now shaping our Vision 2.0 to continue our mission.
