

The BROKE White Paper – Updated September 2025

Introduction: In this white paper, updated in September of 2025, we will both recount the progress Brokecoin has begun since inception, as well highlight and update goals for the remainder of 2025. In 2026, a new white paper will be released as Brokecoin seeks to set attainable achievable goals without overpromising and underdelivering on goals.

1.) Project Overview

Brokecoin is more than just a memecoin, it's a movement and a lifestyle, that is fueled with a work ethic and determination that is rarely seen in crypto. Our community consists of those who've lived through the harsh realities of crypto. Whether you've been liquidated on leverage, rugpulled by unscrupulous developers. wallet drained from fake links, or purely having a unfortunate time in your crypto journey, Brokecoin is your rallying point.

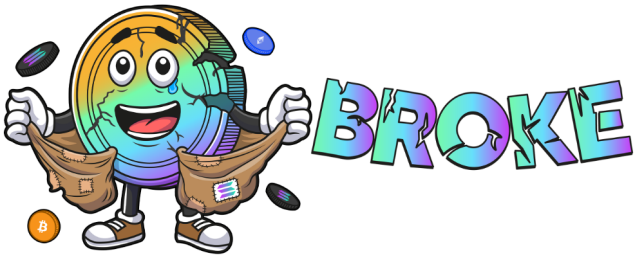

We combine memes with project utilities to generate lasting value for our community members and investors. Our core values are:

CRYP2NOVA

Transparency | Community | Respect.

That means we operate with transparency in our decision making and informing the community with consistent updates to built trust. We have a community first approach that the decisions made by the project, should have an element of understanding the community's perspective and seek to allow the community to feel comfortable in their investment. Finally, we respect all of our investors, non-community members and even those who seek to spread fear, uncertainty and doubt.

Cultural Mantra:

Never Give Up | Never Give In | Never CTO

Our cultural mantra is our rallying call as we operate day to day and navigate a complex market cycle and manage multiple operations, social media platforms, and communities. Never give up, means that despite what may happen during our journey, we will continue to work hard for the community. Never give in, means that whatever situation we come across, we won't allow it to push us away from our goals and will march on no matter what. Never CTO, means that Brokecoin will never be a project where the developer calls it quits and abandons the project. It will never become a failed project that is then taken over by the community as a second attempt to revive the project.

2.) Mission Statement

“Brokecoin: Where transparency and utility meet community.”

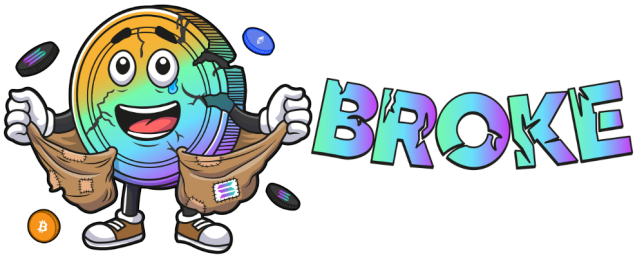

Our mission is to create an environment of transparency where the community is always aware of decisions when possible, foster a place for individuals who thrive in unpredictability and enjoy the memes, and for sophisticated investors who are looking for a project with a blend of utilities that generate value.

CRYP2NOVA

3.) What makes Brokecoin Unique?

- Memes + Real Utility: Unlike many memecoins that rely only on hype, Brokecoin blends culture with tangible value: Long term staking, NFTs, Games, E-commerce, and much more planned for it's long-term growth.
- Registered DAO LLC; Brokecoin isn’t just a meme project, it’s also a legally registered DAO LLC in Wyoming, USA, adding a layer of legitimacy, compliance and accountability.
- Safety in Trading: Brokecoin has its liquidity locked and burned. Brokecoin prioritizes long-term trust over short-term outlook.

- Community at the Core: Decisions are made with the community's best interest in mind. Feedback is embraced, and every member is treated with respect and empowerment. It’s not just about investors it’s about belonging and growing together.
- Degens Welcome: Brokecoin openly embraces the “broke but not beaten” spirit, turning setbacks into solidarity and learning from past mistakes. At Brokecoin, we celebrate each other, recount, and embrace each other's journey.
- Sustainable Growth over chart pump and dumps: Instead of chasing empty hype, Brokecoin is built with steady, organic, and strategic growth to withstand market volatility.
- Real-World Reach: By integrating with real world vendors, launching an e-commerce platform, and developing global campaigns, Brokecoin bridges crypto culture with real-world impact.

4.) Tokenomics

Token Name: Brokecoin

Ticker Symbol: $BROKE

CA: Ga4oZoNRLkZkruJpS8NLwa8DJCwKP9hbTBSNDQZ9V43v

Initial Total Supply: 100,000,000,000 (100 billion)

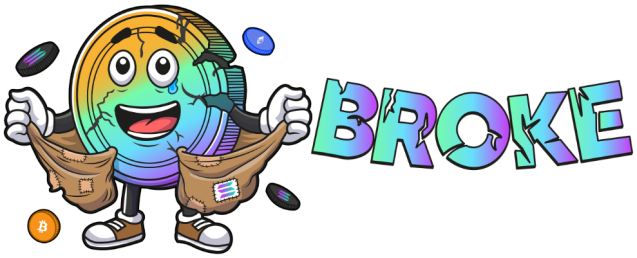

Burned Supply: 10,245,206,479 (as of September 2025)

Circulating Supply: 89,754,793,521

Liquidity: Locked and burned

Future Supply Goal: While not a deflationary project at the moment, future utilities will incorporate a burning mechanism.

7.) Closing remarks

Brokecoin is more than a token, it’s a movement and a lifestyle project built on transparency, resilience, and community. This current 2024-2025 cycle has seen a market filled with uncertainty, rampant scams and rugpulls, we aim to provide not only a safe haven for our community but also build a project that grows through real value and innovation.

With a clear roadmap, community focus and involvement, and commitment to long-term utility development, Brokecoin is positioned to thrive where other projects fade. We invite you to join us in building something bigger than a coin: a culture, a community, and a shared vision of turning setbacks into strength.

Together, we prove that an ethical project that treats it's community well, focuses on sustainability in it's ecosystem, and mixes memes + utility can have a spot among the top projects in the space. Brokecoin is building to become a legacy project to operate through multiple cycles, and to embrace the journey alongside the community.
