Brazilian Digital Token Whitepaper

The BRZ Cryptocurrency Board works with reputable Tellers around the world that buy and sell BRZ Tokens. After passing KYC/AML checks users will be able to purchase, transfer and sell BRZ tokens across multiple platforms.

Sales of BRZ Tokens for fiat currencies are performed according to the Teller's local jurisdiction procedures and regulations.

BRZ Token

STABILITY
Price stability will be pursued by market agents based on the reserves held by the Reserve Managers.

RESERVES
The Reserve Managers keep full reserves. BRZ Tokens are always fully backed.

BLOCKCHAIN TECHNOLOGY
The BRZ is an ERC-20 token built-up on top of the Ethereum blockchain.

SECURITY
The BRZ Smart Contract is the public instrument used for issuing and burning tokens according to convertibility demands. Our crypto transactions are verified by Parsiq.

TRANSPARENCY
The issuance of new tokens and the underlying reserves will be audited by a reputable third-party firm.

GLOBAL ACCEPTANCE
The BRZ Token can be traded in multiple platforms.
