Introduction

Overview

CeluvPlay provides a next-generation gaming and entertainment ecosystem that combines blockchain technology and artificial intelligence (AI) through its Web3 gaming DApp 'Astian'.

Background

> ***'User centric' + 'A.I solution + 'Multi-chain***

In order to solve the various limitations and issues of existing gaming platforms, CeluvPlay actively utilizes and integrates AI solutions to provide more efficient and continuous new games and content.

Additionally, by adopting a multi-chain environment, we are expanding our ecosystem with more users and partner projects.
