MISSION

ClaudeWar is a real-time OSINT platform that organizes public and licensed third-party data on a live 3D globe, adds structured evidence and AI-assisted analysis, and provides alerts, Operative workflows, Markets signals, and paid APIs where available.

- **Use it for:** sourced orientation, monitoring, investigation, AI-assisted synthesis, alerts, and approved integrations
- **Do not use it as:** ClaudeWar is not classified intelligence, an official emergency authority, a safety-critical navigation service, medical advice, personalized investment advice, or proof of causation, readiness, or intent.

Alerts and summaries post to @ClaudeWar1, Telegram, and Discord.

Open Live Globe Create Free Account
PLATFORM

WHY CLAUDEWAR IS DIFFERENT

ClaudeWar is not a typical OSINT map with static pins. Public feeds are fused with proprietary layers built in-house:

- **Multi-domain convergence:** Alerts when unrelated streams (strikes, jamming, weather, maritime stress, and more) align in the same region

Archived copy · cryp2nova.com

- **Market-intel correlation:** Financial themes that require multiple live conditions to align, not single-ticker moves
- **Biosecurity cross-checks:** Outbreak markers paired with public lab and pathogen watch signals
- **AI synthesis with live context:** Card analysis and AI Agent answers grounded in relevant ClaudeWar observations
- **Prediction market curation:** Signals tied to live intel themes, with on-platform track record at markets.claudewar.info/stats

This documentation describes **what you see in the product**. Prior-art titles and high-level method claims live on claudewar.substack.com. They establish timeline and originality, not step-by-step recipes.

WORKFLOW

HOW THE TERMINAL WORKS

Almost every clickable layer follows the same pattern:

1. **Globe visualization:** Marker, line, polygon, or cluster on the map
2. **Intel card:** Structured fields, imagery, or charts where available
3. **Optional Analyze:** AI-written assessment in the card (account required; limits by tier). See Operative & AI.
4. **Downstream alerts:** Public broadcasts, Breaking Alerts, and Market Signal Engines when qualifying observations align

Access: Visitors can preview four ground layers without signing in. A free account unlocks the full globe and 60+ live data layers. Availability and source coverage vary by layer. AI Operative is a $9/month membership with 100 AI requests per rolling 30 days across supported ClaudeWar AI surfaces, plus the Operative Hub and eligibility for Markets signals. Markets has additional wallet and token requirements.

Always-on map elements (no toggle): **conflict-zone markers** (click to filter the news feed and fly to that theater) and **country borders** (monitored territory outlines for context).

FIRST OUTCOME

CHOOSE YOUR STARTING POINT

- **New or free user:** complete one sourced investigation in First 10 Minutes.
- **Analyst:** learn intelligence concepts, then follow region monitoring and event verification workflows.

Archived copy · cryp2nova.com

- **Markets user:** review all account, membership, wallet, and token requirements before opening Markets.
- **Developer:** make a tested request in the Developer Quickstart.
- **Journalist, emergency team, or evaluator:** start with Resources and Trust and Operations.

Start First InvestigationUnderstand the Evidence
LIMITATIONS

SCOPE & LIMITATIONS

- **Flight data:** Public ADS-B sources. Aircraft can go dark or be delayed.
- **Maritime:** AIS is mostly commercial traffic; warships often disable transponders.
- **Reported strikes:** Parsed from news headlines, not battlefield confirmation.
- **GPS jam / ADS-B anomalies:** Probabilistic OSINT; verify through official channels.
- **Biosurveillance:** Awareness only, not clinical diagnosis. See PATHFINDER.
- **AI analysis:** Synthesis over live context; can be wrong. Not a substitute for primary sources.
- **Markets signals:** Research and situational awareness, not verified trading alpha. See Prediction Markets.

GLOBE

THE MAP

- Mapbox GL JS globe projection with touch-friendly controls on mobile
- Red pulsing dots = active conflict zones; click to filter headlines and fly to the theater
- Hover headlines to see connection lines to matching conflict zones
- Orange borders = monitored country outlines
- **Space / Lunar UAP modal:** Separate 3D Moon view for space-related UAP incidents (from the UAP layer)

LAYERS

LAYER CATALOG

What each toggleable layer shows on the globe and what you get when you click. Refresh rates are approximate.

LAYER	ON GLOBE	ON CLICK	REFRESH
GROUND & MARITIME			
Military Flights	Purple jet icons (heading-rotated); watchlist aircraft	Callsign, type, alt/speed/heading, photo,	~15s

Archived copy · cryp2nova.com

	larger	threat tier, optional AI briefing	
Ships / Vessels	Cyan ship icons, clusters, or heatmap by zoom	Name, MMSI, type, course, speed, flag; optional naval AI framing	~30s
Airports	Airport symbols; distress styling near conflict	Reference card, imagery, threat context	Periodic
Shelter Alerts	Flashing shields on affected cities	Alert detail card; banner when active	~10s
Reported Strikes	Red arcs origin to target, animated direction	Strike summary from parsed headlines	~30s
OFAC Designations	Sanctions markers by country	Entity, program, date context	Daily
MV Hondius	Ship marker and voyage track	Vessel and outbreak storyline context	~5m
HEALTH			
Biosurveillance	Disease/outbreak markers	Outbreak intel card; PATHFINDER-style AI on Analyze	~5m
Biosecurity Watch	Orange shields; red pulse on geolocated match	Biosecurity incident card; feeds Operative monitor	~15m
FINANCIAL			
Chokepoint Supply Chain	Named choke markers, vessel counts, stress color	Choke card with counts and correlated prices	With AIS
Market Pulse	Price-labeled markers at geographic anchors	Financial card, 24h change, TradingView chart	~60s
Crypto Overlay	Additional crypto pair markers	Crypto intel card and chart	~60s
SPACE & GEOPHYSICAL			
Asteroid Watch	Asteroid markers	Orbital params, miss distance, hazard context	Periodic
Fireballs	Fireball / bolide markers	Energy, velocity, altitude, size estimate	Periodic
Solar Events	Flare / CME markers	Flare class, timing, infrastructure language	Periodic
ISS Track	Moving ISS marker	Coords, altitude, velocity, crew count	~5s
Aurora Forecast	Aurora oval / visibility extent	Kp-driven forecast card	Periodic

Archived copy · cryp2nova.com

Geomagnetic	Sun-state and storm context	Kp index, storm status (also powers top ticker)	Continuous
Lightning	Lightning strike points (~24h)	Flash time, energy, source	Periodic
DOW UAP R1 / R3	Geocoded incident markers	Declassified incident card; AI for Operative tier	Static corpus
Spacecraft	Deep-space probe markers	Mission status, distance, light-travel time	Periodic
INFRASTRUCTURE			
GPS Jamming	Severity-colored polygons	Jamming zone card; OSINT notice when enabled	~15m
ADS-B Blackouts	Blackout polygons	Coverage-gap explanation card	Periodic
Starlink	Satellite points in viewport	Pass / satellite context; refreshes on map move	~2m
Internet Cables	Submarine cable routes	Route, landing points, optional imagery	Reference
Internet Outages	Country connectivity markers	Disruption card with satellite context	Periodic
WEATHER & HAZARDS (US-focused where noted)			
Severe Alerts	Warning polygons	Alert type, area, expiry	Periodic
Precipitation / Wind / Visibility	Advisory polygons	Advisory detail cards	Periodic
Hurricane Tracks	Track lines and cones	Position, category, forecast	Periodic
Temperature	Heat/cold advisory areas	Advisory detail	Periodic
Earthquakes	Quake markers scaled by magnitude	Magnitude, depth, USGS detail	~24h window
Active Fires	Hotspot points	Brightness, confidence, source	~24h
Flood Zones	Flood polygons	Warning detail	Periodic
Fault Lines	Tectonic line overlay	Fault / plate reference card	Reference
Volcanic Activity	Volcano markers	Status card	Periodic
CELESTIAL (OPTIONAL · NOT MILITARY INTEL)			
Planetary, Zodiac, Retrogrades, Ingress, Dwarf Planets, Comets	Ephemeris markers and overlays	Sign, degree, timing, visibility context	Periodic
MARKETS			

MARKET MARKERS

Archived copy · cryp2nova.com

indices, chokepoints).

On marker click you get live price, 24h change, category context, optional chokepoint stress for commodities, conflict framing for select FX pairs, an expandable TradingView chart, and optional AI Analyze.

GROUP	EXAMPLES	NOTES
Energy	WTI, Brent, Nat Gas	Choke correlation when alerts exist
Metals	Gold, Silver	Commodity cards
Shipping	Baltic Dry Index	Maritime stress context
Agriculture	Major ag futures	Full set on globe when layer on
Indices	S&P 500, Nasdaq, Dow	Equity index cards
Mega-cap stocks	Large-cap equities basket	Individual equity cards with charts
Crypto	BTC, ETH, majors and alts	Overlay adds pairs beyond Market Pulse core
FX	RUB, CNY, ILS, IRR	Conflict-context blurbs where relevant
Volatility / sentiment	VIX, Fear & Greed	Market stress cards
Chokepoints	Hormuz, Suez, Malacca, Bab el-Mandeb, Bosphorus	Vessel count and stress in choke card, not separate tickers

RESEARCH

RESEARCH & DISCLOSURES

- **Prior art & technical disclosures:** claudewar.substack.com for public timestamping of methods and development timeline
- **Defense Innovation Unit reference:** DIU proposal PDF (May 2026) for enterprise and government evaluation. Network acceptance does not imply DoD endorsement.
- **Press & reach:** claudewar.info/press
- **Enterprise API & procurement:** contact@claudewar.info

MOBILE

MOBILE

- **Bottom tabs:** MENU, LAYERS, MAP, INTEL, ALERTS, CHAT
- LAYERS tab holds all data layer toggles; MAP is full-screen globe

Archived copy · cryp2nova.com

- Tap targets meet 44px minimum for touch

SOURCE INFRASTRUCTURE

DATA SOURCES

ClaudeWar aggregates publicly available and licensed third-party feeds. Proprietary correlation, scoring, and detection layers are not documented here.

SOURCE	DATA
AVIATION & MARITIME	
ADSB.lol	Military aircraft positions, ADS-B blackout and GPS jamming analytics
AISStream.io	Global vessel AIS positions and chokepoint throughput
Planespotters.net	Aircraft photos for flight intel cards
OurAirports	Global airport reference and distress context
OpenFlights	Legacy airport seed dataset
Aviation Weather Center	Airport METAR and aviation hazard context
MILITARY INSTALLATION REFERENCE	
Overture Maps on Microsoft Azure	Versioned global military land-use points and boundaries under ODbL
OpenStreetMap contributors	Public installation points, boundaries, service tags, and operators under ODbL
Wikidata	CC0 installation identities, aliases, operators, and linked public entities
GeoNames	Military-base names, alternate names, and approximate coordinates
NGA Geographic Names Server	Official standardized foreign geographic names and variants
NTAD / DISDI	Authoritative public U.S. DoD installation locations and available boundaries
CONFLICT & ALERTS	
Google News RSS	Conflict headlines and strike parsing
GDELT Project	Global event headlines for biosecurity and biosurveillance
Pikud HaOref	Israeli Home Front Command shelter alerts
Tzeva Adom	Israeli alert relay API
INFRASTRUCTURE & CONNECTIVITY	
Mapbox	Globe rendering, geocoding, and satellite imagery

Archived copy · cryp2nova.com

TeleGeography	Submarine cable routes and landing points
IODA (Georgia Tech)	Internet outage scores by country
OFAC SDN Search	U.S. Treasury sanctions designations
SPACE WEATHER & ASTRONOMY	
NOAA SWPC	Kp index, geomagnetic storms, aurora, solar wind, GOES X-ray and GLM lightning
NOAA NWS	Severe weather alerts, precipitation, wind, visibility, temperature, flood warnings
NOAA NHC	Hurricane tracks and forecast cones
NASA CNEOS	Fireballs and close-approach objects
NASA NeoWs	Near-Earth object feed
NASA DONKI	Coronal mass ejection events
NASA FIRMS	Active wildfire hotspot detections
NASA SDO	Live solar disk imagery
NASA SOHO	Coronagraph imagery
NASA JPL Horizons	Spacecraft, comet, and ephemeris positions
NASA JPL Fireball API	Bolide trajectory and energy estimates
CelesTrak	Starlink TLE elements and supplemental groups
Space-Track.org	Supplemental satellite ephemerides
Open Notify	ISS position and crew count
International Meteor Organization	Witness-reported fireball events
GEOPHYSICAL HAZARDS	
USGS Earthquake Hazards	Seismic event catalog and shakemap links
USGS Volcano Hazards	Volcanic activity status
USGS PB2002	Tectonic fault line reference geometry
FEMA NFHL	Flood zone geometry
Smithsonian GVP	Global Volcanism Program status
GeoNet New Zealand	Supplemental volcano feed
FINANCIAL	
Yahoo Finance	Equities, indices, commodities, FX, and agriculture futures
Pyth Network	Live oracle prices for Market Pulse and crypto overlay
CoinGecko	Supplemental crypto reference prices
CNN Fear & Greed Index	Market sentiment index
TradingView	Chart widgets in financial intel cards
PUBLIC HEALTH	

CRYP2NOVA

World Health Organization	Disease outbreak news and DON feeds
U.S. CDC	Outbreak RSS, health alerts, and MMWR
HealthMap	Geolocated disease clusters
ECDC	European infectious disease threat feeds
CIDRAP	Infectious disease news and analysis
ProMED-mail	Global outbreak reports
FluTrackers	Community surveillance forum RSS
FAO EMPRES-i	Animal health emergency events
USDA APHIS	Agricultural biosecurity signals
GOVERNMENT & AI INFRASTRUCTURE	
U.S. DoD UAP Releases	Declassified UAP incident corpus on globe layers
Azure-hosted OpenAI deployments	Current production model infrastructure for supported ClaudeWar AI features

FAQ

FREQUENT QUESTIONS

Is ClaudeWar affiliated with Anthropic?

No. ClaudeWar LLC is independent and is not affiliated with, endorsed by, or sponsored by Anthropic.

What can I use without an account?

Visitors can preview four ground layers without signing in. A free account unlocks the full globe and 60+ live data layers. Availability and source coverage vary by layer.

Why only military flights?

ClaudeWar focuses on military and government aviation from a dedicated public feed. Civilian traffic is filtered out by design.

Why do military ships rarely show?

Warships often disable AIS. Maritime Intel is mostly commercial shipping.

What are watchlist aircraft?

Known high-value military types get larger icons, enhanced cards, and may trigger auto-posts. Details on the Operative page.

Does the military bases layer contain every base?

No public source can guarantee every installation. ClaudeWar fuses permitted public records, preserves provenance, and labels sites verified or probable. Static catalog presence does not indicate current military activity.

How is this funded?

AI Operative subscriptions, API tiers, optional tips, and community support. See /access.

AI disclosure: ClaudeWar AI features query and summarize ClaudeWar data; they are not trained on a private ClaudeWar model. ClaudeWar AI features run through ClaudeWar-managed third-party model infrastructure. Production currently uses Azure-hosted OpenAI deployments. AI output can be
