Vision

Liquid AI Data Infrastructure

Anything a human can do on a desktop can be **captured as training data, tokenized & traded** creating true liquid ownership of AI datasets.

💡 The Breakthrough

For the first time, **we give YOU the tools to create value in the data economy**:

```
Record your screen → Tokenize your data → Trade IP access → Create value
```

The first market where you create, own & trade the data that trains computer-use agents.

CLONES Data Infrastructure

🔨 The Forge

AI Data Extraction Tool

The engine powering liquid market for digital human expertise

Archived copy · cryp2nova.com

- **Factory System:** Enabling anyone to fund the acquisition of computer-use training data
- **AI Grading Agent: A**utomated quality scoring ensures only valuable data gets rewarded
- **On-Chain Incentives:** Referral rewards and XP-style progression unlock exclusive quests
- **24/7 Global Collection:** Data gathering worldwide by anyone, anywhere, at any time.

🏪 Data Marketplace

On-Chain Exchange for Tokenized Datasets

First threshold-gated IP market for digital human expertise

- **Token Launches:** Datasets via AMM bonding curves enabling liquid markets *(like virtuals.io)*
- **Burn-to-download:** Burn creator-set threshold for commercial IP access
- **Creator Fee :** On-chain volume fee ensure creators earn royalties forever from every trade
- **Atomic Data Access:** Buy exactly what you need, instantly

CRYP2NOVA

🧠 Meta-Datasets

Best training data merged into elite datasets

Cross-domain insights powering enterprise AI automation

- **Protocol Curation:** Best-graded tasks across multiple datasets by niche
- **Private Token Allocations:** Priority access for creators, IP holder and $clones stakers
- **Enterprise-Grade Quality:** Perfect bundles for specific industry themes
- **Cross-Industry Intelligence:** Insights impossible to obtain elsewhere

Decentralized Referral Engine

Exponential growth powered by community incentives

On-chain referral system where ecosystem growth directly rewards those who brings value

- **Lifetime Commissions:** Earn 1-5% from all referred participants activity
- **Staking Multipliers:** Higher $CLONES stakes unlock better commission rates
- **Transparent Payouts:** All rewards distributed instantly on-chain
- **Network Effects:** Every new participant makes the entire ecosystem more valuable

The Result

A fully **decentralized data economy** where digital human expertise flows from creation to monetization while **exponential community-driven growth** ensure every participant captures value.

> ***"Data trained by humans, for AI."***
