1 What is cod3r.ai

THE WORLD'S FIRST WEB3 AI APP BUILDER.

> **cod3r.ai is a Web3-native AI platform that turns your ideas into fully functional web applications - no coding skills required. You describe it, COD3R builds it.**

cod3r.ai sits at the intersection of AI-powered app generation and decentralized Web3 infrastructure. Unlike traditional app builders that require credit cards and centralized accounts, cod3r.ai uses your crypto wallet as your identity and accepts USDT/USDC for all payments - no banks, no middlemen, no borders.

The platform launched in February 2026 and is already live at `cod3r.ai`. Whether you're a developer, founder or creator with zero coding experience, you can generate, preview and deploy web applications entirely through a conversational AI interface.

> **Platform is live. Available now at cod3r.ai. Connect your wallet and start building for free - no credit card, no sign-up form.**

Core Philosophy

⚡

You feel it, COD3R codes it

Describe your idea in plain language. The AI handles all the code, structure, and deployment logic behind the scenes.

🌐

Web3-Native by Design

Your wallet is your account. Payments are crypto-only. No personal data collected beyond what's necessary to operate the service.

🚀

From idea to live app

Create, preview, edit, and publish to a custom domain - all in a single workflow without leaving the platfor

🔓

No borders, no middlemen

Anyone on earth with a crypto wallet can access the full platform. No geographic restrictions, no payment barriers.
