Features

White Paper

The RZ CoinBank whitepaper is your concise guide to what we are building and why. It lays out the vision, the user-first ownership model, and the non-custodial architecture that keeps assets in your wallet. You will see how contracts execute finance on-chain, how audits, proofs, and timelocks create accountability, and how products like investment, card, credit, insurance, and RWA fit together.

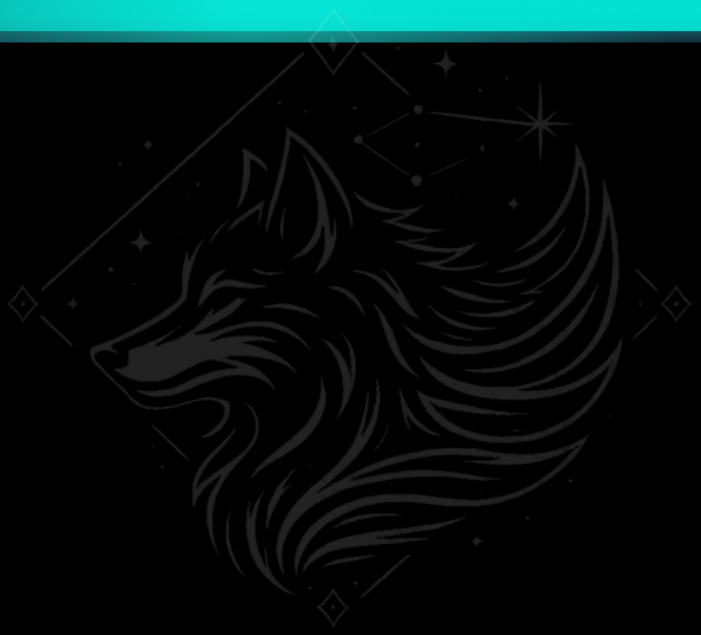

Inside you will find an executive summary, product and architecture diagrams, risk and compliance notes, and a roadmap with measurable milestones. The goal is clarity: what the system promises, how those promises are enforced by code and governance, and how you can independently verify results.
