ABOUT

Welcome to COMPUT3's documentation. This is an introduction to the organization, benefits of leveraging our compute and how to get started now.

Quick Navigation

- Guide to get your C3 Api Key
- Make your first free API calls to Llama3:70B
- API to launch, manage and query workloads
- Use our pull and execute examples
- Learn about the docker images
- Check out C3's Github ↗

Introduction

The COMPUT3 platform revolutionizes GPU and LLM inference access providing a crypto-first infrastructure. Comput3 offers infrastructure through an API that enables private, scalable, and cost-effective access to inference on a private GPU.
LLM Inference that can be used for AI agents, teams, and organizations while providing choice between popular foundational models.

Archived copy · cryp2nova.com

The platform has been build by a small group of engineers, and has been funded by the team privately.

Benefits

Private & Censor-free Computing Environment

- **Complete Privacy**: LLMs, AI models, and data remain yours in a secure, private environment.
- **Model Flexibility**: Choose from any open-source LLM to power your applications.
- **Dedicated Resources**: Access to private GPU/Node network powered by NVIDIA chips.

Cost-Effective GPU Access

- **Cloud Instance Optimization**: Leverage our proprietary technology providing competitive pricing. Access the latest GPU's for less then $1 per hour.
- **Crypto Payment Integration**: Seamless payment processing using Solana.
- **Pay-Per-Use Model**: Only pay for the compute resources you actually use. Switch on and off whenever you need.

CRYP2NOVA

Flexible Deployment Options

- **API-First Architecture**: Straightforward integration with your existing applications.
- **Multiple Access Methods**: Choose between private/unlimited GPU/API access or limited API based solutions.
- **Scalable Infrastructure**: Easily scale your GPU resources as needed.

Getting started

Set-up an account and get started within minutes with our Quickstart Guide.
