COPX DAO Whitepaper

Copy

Summary

COPX DAO is entirely established and operated by community members voluntarily, with governance executed through smart contracts, adhering to the principles of fairness, transparency, and decentralization. Through continuously iterating AI tools, it is dedicated to bridging the gap between traditional finance (TradFi) and cryptocurrency, building a novel aggregated financial ecosystem.

The COPX token is the engine of the entire ecosystem, where "C" stands for Community, "O" stands for Opportunity, "P" stands for Partnership, and "X" represents the infinite possibilities of the future.

Tokenomics

The COPX Token is the utilized token within the COPX DAO ecosystem, divided as follows:

Category	Amount (in COPX)	Percentage	Release Duration
Private Investment	100 million	10%	2-year linear
Team	150 million	15%	4-year linear
Community	50 million	5%	4-year linear
Trade Mining	700 million	70%	N/A
Total Supply	1 Billion	100%

Trading Mining Rules

Description	Value
Initial Daily Minting	36,000 COPX
Daily Increment	150 COPX
Annual Decrease in Daily Increment	-25 COPX
Minting Duration	About 11 years

Trade Mining Calculation Formula

Users' Trading Minting

$$M_a = \frac{V_0}{V_{all}} * M$$

Ma = V allV 0 ∗ M

M_aMa— *Daily token rewards for a specific user*

V_0V 0— *User's daily trading volume across various exchanges.*

V_{all}V all— *Total daily trading volume on COPX DAO*

MM— *Total daily token minting*

COPX Token BSC Contract Address

0x0d4629Ff6D6cA422178dC66A21Eea0DfB182e72c

COPX Token Burn Address

0x000000000000000000000000000000000000dEaD

Governance

DAO Governance Mechanism

To ensure fairness and transparency in community governance while promoting efficient decision-making, COPX DAO enforces the following governance protocols via smart contracts.

Governance Token

25,000 governance tokens linked to 250 million private investment and team tokens. These tokens are permanently assigned to specific partner wallets, are non-transferable, non-circulating, and exclusively used for voting and benefit distribution.

Partners

Active COPX holders contributing to the community may become partners in COPX DAO. Partners possess voting and governance token minting rights proportional to their token holdings.

CRYP2NOVA

Voting Mechanism

Partners may propose initiatives on the community platform and submit them for a vote within COPX DAO, requiring a 75% approval rate based on the governance tokens corresponding to circulated COPX tokens.

Reforge and Burn

Governance tokens are automatically burnt when COPX tokens are removed from a partner's bounded contract address. Thus, a new quota for minting governance tokens becomes available. The reforge of governance tokens is determined by the COPX tokens deposited into the specified address, prioritized by the time of entry, and stops once the cap is reached.

Principle

COPX DAO is not a corporate entity but rather a set of regulations structured around smart contracts. Comprising developers and stakeholders who hold COPX tokens, it is driven by their proactive involvement in guiding the project to success.

Individuals with governance token privileges can propose partnerships and protocol upgrades for COPX DAO, with token holders empowered to vote on the approval or rejection of these proposals.

Partnerships or COPX use cases funded by other parties, such as hackathons, educational programs, and advertising sponsorships, do not require formal proposals. COPX DAO welcomes all types of pro bono promotional opportunities and applications of COPX.

Ecosystem Blueprint (AI-Community-Fi)

AI Financial Tools

AI financial tools serve as a key driver for the COPX platform, enhancing its functionalities and attracting more users through a virtuous cycle of data collection and optimization. As user interactions generate extensive data, it updates training sets for large language models, continuously refining AI capabilities.

Application Scenarios for AI Tools

Algorithmic Trading

Utilizes advanced LLMs and machine learning algorithms to automate decision-making, boosting the speed and accuracy of trading operations while minimizing human errors.

Investment Advisory

Precisely analyzes users’ financial conditions and risk preferences to offer tailored investment advice.

Risk Alerts

Processes and analyzes historical transaction data within the DAO, monitors market dynamics in real-time, identifies anomalous trading activities, and provides timely alerts to mitigate investment risks.

Rebate System

In COPX DAO, the rebate system is a key component that leverages transactions and sales of financial products to generate commissions. These commissions are then distributed to marketing agents based on established guidelines. This mechanism provides lucrative opportunities for affiliate partners and brokers but also plays an essential role in expanding the community and boosting the ecosystem's dynamism.

Market Roles

CRYP2NOVA

Financial Institutions

Cryptocurrency and traditional financial institutions connect users through COPX DAO to provide financial services.

Users

They are the consumers of various services in the ecosystem and also investors in the cryptocurrency and traditional financial sectors.

DAO Partner

Archived copy · cryp2nova.com

A broker who is eligible to receive commission earnings. Additionally, they participate in governance voting and enjoy related benefits.

Rebate Rules

Category	Percentage	Description
Channel Commission	60%	Direct earnings allocated to market promoters.
Token Repurchase and Burn	12%	Tokens will repurchased at market price and destroyed to induce deflation.
Platform Operations	12%	Used for daily operations of the platform infrastructure.
Token Repurchase	16%	Initially used for market making, and later to reward investors, reducing their trading and investment costs.

This rebate system ensures the active participation of marketing personnel and continuously enhances the value of COPX DAO tokens through the token buyback and destruction mechanism.

Additionally, the ratio of channel commissions can be adjusted based on the specific needs and characteristics of different products and channels to adapt to various market environments and policy changes.

COPX Community

COPX leverages social media platforms such as Discord, X, Instagram, etc., to provide users with a comprehensive platform for sharing, interacting, and accessing the latest financial information.Through AI bots, it establishes rich interactive mechanisms and reward systems, seamlessly integrating token systems with community activities, motivating users to actively participate and obtain necessary customer support and educational resources.

Archived copy · cryp2nova.com

Furthermore, COPX fully utilizes the powerful scalability of AI bots by directly integrating their core functions into social media platforms. This allows users to access all COPX features without installing any additional software, thereby maximizing user experience.
