CryptoHog (HOGSCOIN) Whitepaper

About Us

HOGSCOIN is the native token of **HogHerd**, a Play-to-Earn and meme token discovery platform built on **BNB Chain**. Our mission is to simplify the search, analysis, and trading of high-potential meme tokens, while offering unique earning mechanics through games and tasks. HogHerd also supports early-stage crypto projects with visibility, marketing, and community access.

Contract Address (BEP-20): `0xF40A230bd8162E34f97A3e113c4e44A7e9bAFa16`

What is HogHerd?

HogHerd is a decentralized platform that combines:

- A **DEX-integrated scanner** for meme tokens
- Smart filtering and analytics tools
- Real-time project discovery
- A Play-to-Earn mini-game ecosystem on Telegram

The ecosystem helps users identify the most promising tokens on BNB Chain while enabling new projects to grow through direct community engagement and utility-based campaigns.

What We Offer

- **Token Discovery Tools**: Filter and analyze meme tokens in real time using on-chain data.
- **Play-to-Earn Game**: Users complete tasks, play games, and earn rewards in crypto.
- **Project Growth Engine**: Projects gain exposure through community-powered campaigns.
- **Ecosystem Utility**: Points earned can be used within the HogHerd ecosystem.

Earn with HogHerd

Users can: - Play and earn **HOGSCOIN** and other project tokens - Complete tasks and quizzes for **HogsPoints** - Participate in campaigns from partnered projects
