Overview of DAPPOS

DAPPOS builds low-barrier AI products that put powerful AI in everyone's hands, without the learning curve. Its flagship product, xBubble, is a low-prompt AI agent that turns simple requests into ready-to-use results. xBubble lowers the barrier by automatically coding, testing, and dispatching task-specific AI SOP solutions, so users can focus on their goals rather than manually coding skills or operating AI.

DAPPOS Ecosystem

xBubble is DAPPOS's flagship AI product. It unlocks cutting-edge AI productivity with far fewer prompts, much less trial-and-error, and a much lower learning curve.

xBubble turns short user requests into finished work across documents, slides, websites, images, videos, research, automation, and scheduled tasks. It is powered by Bubble Engine, Bubble Pilot, and xBubble's SOP system.

Web3 AI OS

Web3 AI OS is DAPPOS's crypto-native AI product for researching, planning, and executing Web3-related tasks.

Archived copy · cryp2nova.com

Web3 AI OS combines an Intelligence Layer for Web3 research and reasoning with an Execution Layer for intent-based on-chain workflows. It includes the Multi-Agent Framework, a Web3-focused Bubble Engine, the Intent Execution Network, Instant dApps, the Discover Page, and BubbleUp contribution flows.
