IMPORTANT NOTICE · PLEASE READ

$DSACHI is a memecoin and a speculative digital asset. It does not represent equity, debt, ownership, dividends, revenue rights, governance rights in a legal entity, or any claim on future profits. Nothing in this document is financial, legal, tax, or investment advice. Participation involves substantial risk, including the possible loss of all funds. Always verify the official contract address and links before transacting. Official site: https://www.dsachi.com/.

Archived copy · cryp2nova.com

SECTION 01

Executive Overview

Dark Sachi ($DSACHI) is a Solana memecoin brand built around a distinctive black-cat mascot, late-night trading culture, and a dark cinematic identity. It is not positioned as another cute animal token. It is a culture-first crypto brand for terminal dark-mode traders, chart watchers and meme creators who understand that the strongest memecoins are not only launched — they are performed, repeated, remixed and believed in.

The project centres on Sachi: a glossy black cat with folded ears, huge yellow eyes and smug, omniscient energy. Sachi watches the charts at 3AM. Red candles are snacks. Liquidations are toys. FUD is breakfast. Diamond paws are protected in the void.

Version 2.0 introduced the project's defining trust move: publishing the historically clustered team and early-insider wallets instead of waiting for an outside tracker to surface them. Version 2.1 keeps that commitment current, corrects the registry to reflect the latest on-chain state, and publishes the roadmap the community has been asking for.

24	37.16%	371.59M
WALLETS IN REGISTRY	OF TOTAL SUPPLY	$DSACHI DISCLOSED

WHAT CHANGED IN V2.1

Registry updated from 25 to 24 disclosed wallets. One address previously listed as entry #25 has been removed from the registry and is no longer published in this document or on the transparency page.
Disclosed cluster total updated to 371,594,014 $DSACHI. The rounded share of the 1,000,000,000 supply is unchanged at 37.16%.
Roadmap published. The Seasons of Sachi roadmap and the near-term objectives are now part of the public whitepaper rather than an internal planning document.
Refreshed brand presentation. Cover, plates and section design were rebuilt around the Dark Sachi visual system. Live verification now lives at dsachi.com/transparency.

MEMECOIN RISK DISCLOSURE

Participation in $DSACHI involves substantial risk, including the possible loss of all funds used to acquire the token. Memecoin markets are highly volatile, narrative-driven and unpredictable. Only participate with funds you can afford to lose, and always verify official links and the contract address before transacting.

PART I

THE BRAND

Thesis · The character · The visual system

The cat that watches the charts at 3AM.

CORE BRAND LINE

Archived copy · cryp2nova.com

SECTION 02

Brand Thesis & the Character

Most animal memecoins lean cute, loud or chaotic. Dark Sachi takes a different lane: dark luxury, nocturnal trading culture, occult visual language and black-cat mythology. The brand is built on a simple insight — crypto has a night shift. There are traders awake at 3AM watching red candles, refreshing charts, reading timelines and laughing through volatility. Dark Sachi is the mascot for that state of mind.

CORE POSITIONING

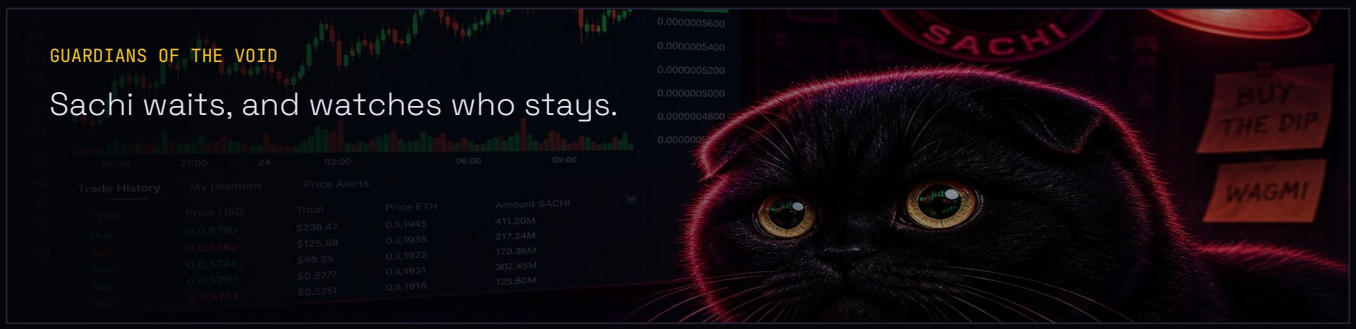

Dark Sachi is the shadow-cat overlord of the timeline — for degens who trade in terminal dark mode.

The void that stares back at your portfolio. · Red candles are snacks, FUD is breakfast. · I liquidate paper hands, I cuddle diamond paws. · Sachi sees everything.

The character

Sachi is the emotional centre of the project — not just a logo, but the voice, the mythology and the social engine of the brand.

ELEMENT	WHAT IT DOES FOR THE BRAND
Silhouette	Glossy black fur, folded ears, a round head — recognisable at sticker size.
Eyes	Huge gold-yellow eyes that carry the brand's single warm accent colour.
Personality	Smug, sleepy, omniscient. Mischievous on the surface, quietly protective underneath.
Narrative role	The cat that appears when the market bleeds. She does not panic at red candles — she eats them.
The community	Holders are not just holders. They are Guardians of the Void.

Archived copy · cryp2nova.com

SECTION 03

Brand System

Dark Sachi's visual identity is one of its primary competitive advantages. The system should stay consistent across the website, X, Telegram, Discord, stickers, banners, memes and campaign art. Restraint is the point: a void-black base, one warm accent, and glow used only where it means something.

COLOUR	HEX	USE
Void Black	#050508	Primary background and brand atmosphere
Charcoal	#141421	Panels, cards, secondary surfaces
Void Purple	#4B0082	Depth, shadow, occult atmosphere
Neon Magenta / Red	#FF1A4B	Glow, danger, FUD, red candles, emphasis
Sachi Gold	#F5C542	Sachi's eyes, premium accents, key highlights
Controlled Green	#3FD98A	Verification, confirmation and bullish moments only

VISUAL MOTIFS

- Candlestick charts — green candles breaking through red.
- Moons, stars and cosmic voids.
- Arcane circles, runes and tarot-style framing.
- Night windows, glowing monitors, keyboards at 03:33.
- Dark metallic coins, fish bones, toy-fish references.

VOICE & TONE

- Dark, but not depressing.
- Funny, but not cringe.
- Premium, but not corporate.
- Crypto-native, but understandable.
- Mysterious — and completely plain when trust is the subject.

Token Facts & Verification

FIELD	DETAILS
Token name	Dark Sachi
Ticker	$DSACHI
Chain	Solana
Launch venue	Pump.fun (graduated to the PumpSwap AMM)
Contract address	CXpnmmiRH7QRN5nKJciuf7FNyYwd7H59mwDjkmD6pump
Official page	pump.fun/coin/CXpnmmiRH7QRN5nKJciuf7FNyYwd7H59mwDjkmD6pump
Token category	Memecoin — speculative digital asset
Total supply	1,000,000,000 $DSACHI
Disclosed registry	24 wallets · 371,594,014 $DSACHI · 37.16% of supply
Live verification	dsachi.com/transparency
Core theme	Dark-mode cat culture, late-night trading, void mythology

VERIFY THE CONTRACT ADDRESS

The official Solana contract address is CXpnmmiRH7QRN5nKJciuf7FNyYwd7H59mwDjkmD6pump.
Trade only via the official Pump.fun page:
https://pump.fun/coin/CXpnmmiRH7QRN5nKJciuf7FNyYwd7H59mwDjkmD6pump. Impersonation and copycat tokens are common. If an address does not match the one printed here and on dsachi.com, it is not $DSACHI.

Section 05 · Launch principles

Simple by design

Dark Sachi follows a community-first launch philosophy and avoids complex token mechanics that could confuse participants or create unrealistic expectations.

- No presale framing — the project is positioned around open participation.
- No guaranteed returns — $DSACHI is a speculative memecoin with no profit promise.
- Public contract address — the official CA is displayed consistently across the site and channels.
- Community-first distribution — reliance on public market participation and cultural adoption.
- Transparent communication — official links, wallets and updates published consistently, including the wallet registry in Section 06.

This document deliberately does not publish a percentage-by-percentage allocation table. Beyond the disclosed registry below, no fixed allocation, treasury split, charity percentage, listing or partnership is claimed or guaranteed. Anything of that kind will be announced publicly, on the record, only when it actually exists.

Archived copy · cryp2nova.com

SECTION 06 · UPDATED IN V2.1

Wallet Transparency Registry

This section exists because hiding a wallet cluster does not make it disappear — it only means someone else discovers it first, without context. Dark Sachi publishes its team and early-insider wallet registry in full, sourced directly from the Solana blockchain.

24	371,594,014	37.16%
WALLETS DISCLOSED	$DSACHI IN REGISTRY	OF 1B SUPPLY

Why this registry exists

These addresses share historical on-chain links — common funding sources, direct transfers or synchronised activity dating back to the project's early days — that on-chain analytics tools group together as a single cluster. They represent team, founder and early-execution wallets used to bootstrap liquidity, marketing and operations before the community-facing distribution took shape. Historical Solana transfers cannot be erased after the fact; moving them through new wallets would only create fresh links and look like concealment. The only durable response is disclosure.

Disclosure principles

- Explain, don't erase — every historical link stays visible on-chain; this document labels it.
- Full address list — all 24 wallets are published with balances, not a summary or an average.
- Chain-sourced data — balances are read from Solana, not estimated.
- No new cross-wallet transfers — the registry is disclosed as-is and should not grow through further internal transfers.
- A reduction path, not a freeze — Section 07 describes how concentration is intended to come down over time, publicly.

CRYP2NOVA

SNAPSHOT, METHOD & THE V2.1 CORRECTION

Balances reflect the $DSACHI (SPL token) holdings of each address as read from Solana mainnet at the time of publication. Balances change as wallets transact — treat this table as a point-in-time disclosure, not a live feed. V2.1 change: the registry now contains 24 addresses. The address previously published as entry #25 has been removed and is intentionally not reproduced anywhere in this document. The disclosed total is 371,594,014 $DSACHI; the rounded share of supply is unchanged at 37.16%.
For the current state of any address, look it up on a Solana explorer such as solscan.io or explorer.solana.com. The maintained list lives at dsachi.com/transparency.

Balances are displayed rounded to whole tokens, so the column may differ from the registry total by a fraction of a token. Every address above carries the same public label in the registry: Disclosed cluster wallet — including `HnmQLY6jGQdqTPy5V2cbb5sgEPSKTGyeF8gc6ijXJYJg`, which remains part of the disclosed registry. Verify any address on-chain, and treat the live page as authoritative over any PDF snapshot: https://www.dsachi.com/transparency/.

Archived copy · cryp2nova.com

SECTION 07

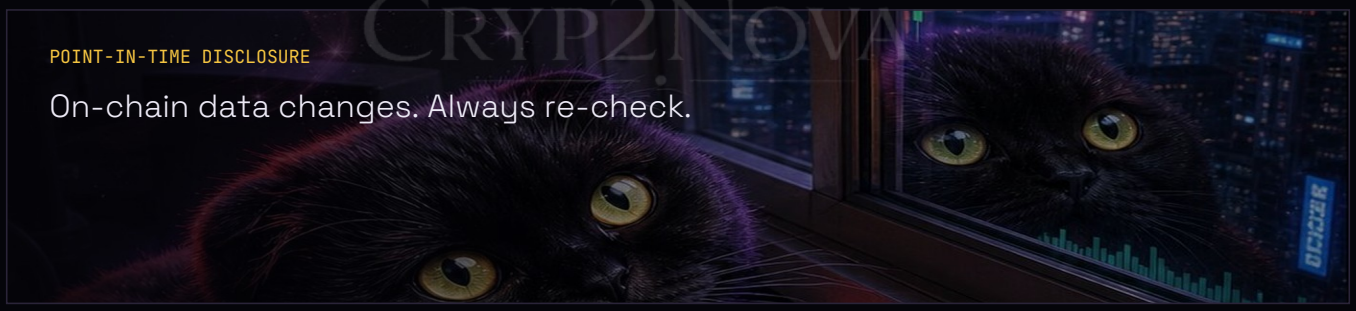

Concentration Reduction Plan

Disclosure is step one. The steps below describe how Dark Sachi intends to reduce registry concentration over time and keep the community updated as it happens. These are stated intentions, not binding commitments to any date, mechanism or target.

STEP	ACTION	STATUS
1 · Publish	Disclose all registry addresses and combined holdings in the whitepaper and on the website.	Complete
2 · Label	Classify each wallet by function (team, marketing/ops, early contributor, reserve) in the public tracker.	In progress
3 · No new links	No further transfers between registry wallets; movement should be outbound to market, locking or vesting only.	Ongoing policy
4 · Lock / vest	Move eligible team-controlled balances into a public, verifiable lock or vesting schedule.	Objective
5 · Reduce over time	Disclose any distribution or sale from registry wallets in advance where possible, or report it afterwards with transaction links.	Objective
6 · Recurring reporting	Publish updated snapshots of registry balances on a regular cadence alongside Stray Sachi Fund reports.	Objective

WHAT THIS DOES NOT MEAN

Disclosure of this registry is not an admission of wrongdoing, and it does not guarantee future price performance, liquidity, or that concentration will reach any specific target on any specific date. It means the community has the same information the team has, instead of having to reconstruct it from a block explorer. No allocation, lock or timeline in this section should be read as a promise of profit or as investment advice.

POINT-IN-TIME DISCLOSURE

On-chain data changes. Always re-check.

PART III

THE ROADMAP

Seasons of Sachi · Near-term objectives · Culture

We ship, we celebrate, we move on.

THEMES REPLACE PRICE TARGETS

Archived copy · cryp2nova.com

SECTION 08

Roadmap — Seasons of Sachi

The Dark Sachi roadmap is lore-first and deliberately qualitative. Themes replace price targets, and each season is a chapter: build it, ship it, celebrate it, move on. Everything below is a planned community objective — not a guaranteed outcome, a delivery commitment, or a promise of any financial result. Items may change, slip, merge or be dropped entirely.

SEASON I · AUGUST – OCTOBER 2026

The Season of the Void

Sachi opens her eyes. The objective is to build the ground the community stands on: legal identity, trust signals and the first repeatable rituals.

- Begin trademark filings for the Dark Sachi brand and start the international application track.
- Hold the founding meeting for an Israeli non-profit association (Amuta) intended to carry the charity work, and file it.
- Keep the wallet transparency registry published and current; move eligible team/dev balances into public on-chain locks.
- Voluntary liquidity top-up with locked LP tokens as a public trust signal.
- Improve token information pages and data-aggregator listings so holders see accurate, verified links.
- Ship the first documented charity donations with shelter confirmation, receipts and video.
- Establish the daily 3:33 AM 'Sachi Cam' cadence and a regular Spaces schedule.
- Release sticker pack v1 and the first animation loops.

SEASON MILESTONE A first public shelter partnership announced with a transaction receipt and video.

SEASON II · NOVEMBER 2026 – JANUARY 2027

The Curling Season

The community curls into Sachi's lap. The objective is for the brand to start doing things beyond being held.

- Dark Sachi web game MVP — a click-Sachi accumulator with a leaderboard and weekly community prizes.
- Pursue official approval for the Amuta and begin the process toward Israeli tax-deductible charity status.
- Merch shop v2 with limited drops for long-term holders.
- Explore a concentrated-liquidity pool alongside the existing AMM pool.
- Run the first community governance vote (which shelter, which merch design).
- Formalise the monthly 'Void Feeding' community ritual with a public, verifiable address.
- Open exploratory exchange-listing conversations — nothing is confirmed, promised or announced until signed.

SEASON MILESTONE Game MVP crosses 1,000 unique wallets played; the first Amuta annual report is drafted.

Archived copy · cryp2nova.com

SECTION 08 · CONTINUED

Seasons III – IV

SEASON III · FEBRUARY – APRIL 2027

The Long Nap

Sachi sleeps deep. The objective is to compound: reach, resilience and independently checkable trust signals.

- Investigate a bridge to an EVM L2 with liquidity supported on both sides.
- Prepare a complete compliance and legal packet so the project can answer institutional questions properly.
- Web game v2 with on-chain rewards and cosmetics for holders.
- Seek an independent review of treasury and charity flows by a Solana-native audit firm.
- Publish a charity report covering amounts donated, shelters supported and outcomes documented.
- Explore collaborations with cat-rescue organisations and creators — none are agreed or announced.

SEASON MILESTONE The first independent review of treasury and charity flows is published.

SEASON IV · MAY – JULY 2027

The Rite of the Nine Lives

Sachi wakes. The objective is longevity: the brand outlives the cycle and the community can carry it without the core team.

- Publish a full annual impact report for the charity entity, if and when it is approved and operating.
- Hand treasury-vote coordination to a community-elected Council of Nine.
- Full game v3 with multiplayer, seasonal events and an in-game economy.
- A physical community meet-up — ideally with real cats present.
- Release lore book v1: art, stories and community submissions.

SEASON MILESTONE The community — not the core team — executes at least one major initiative end to end.

HOW WE TALK ABOUT THE ROADMAP

No price targets. No exchange names before anything is signed. No exact dates beyond the current season. Themes, deliverables and completed milestones only. Shipping a small thing on time beats promising a big thing on a date.

Archived copy · cryp2nova.com

SECTION 09

Near-Term Objectives

The current season is organised into four workstreams. This is what the team is working on now. Each item is an objective with a definition of done, published so the community can check the work rather than take it on trust. Timing may move.

WORKSTREAM	OBJECTIVES FOR THE CURRENT SEASON
Trust	Trademark filings started; charity entity founding meeting held and filed; wallet transparency registry published and maintained; eligible team/dev wallets moved into public on-chain locks.
Market	Voluntary liquidity top-up with locked LP tokens; conservative market-making with tight spreads and no self-trading; accurate token info pages and verified links across aggregators. Explicitly no wash-trading or volume bots — a strategic decision, not a budget one.
Demand	A weekly 'Void Trader' community competition with a public leaderboard; a coordinated drop with vetted micro-creators paid in vested tokens; cross-project Spaces; a small merch drop payable in $DSACHI.
Story	First charity donation shipped with video proof; the Seasons of Sachi roadmap published; animation assets delivered; a three-times-weekly Spaces cadence running with rotating hosts.

EXPLICITLY NOT DOING

No volume or wash-trading bot. Detection risk on the major data aggregators, listing risk, and reputational risk outweigh any short-term chart benefit. Volume should come from competitions, creators, Spaces and organic buyers — not from self-trading.

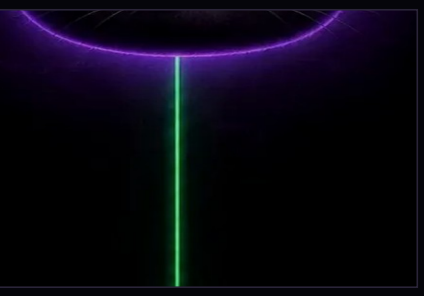

ONE LINE THE TEAM WORKS TO

We are building a memecoin that a compliance officer, a shelter director and a degen can all defend. Every objective has to survive all three tests.

CRYP2NOVA

INTO THE VOID WE PUMP

Ship the boring things first.

Archived copy · cryp2nova.com

SECTION 10

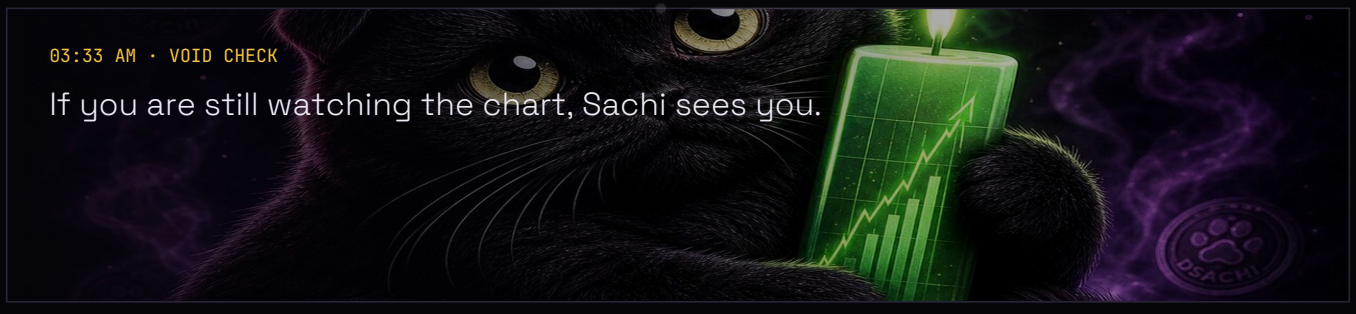

Community, Culture & Rituals

Dark Sachi does not rely on artificial utility claims. Its primary utility is cultural participation: creating memes, joining rituals, spreading the brand and building community status around the character. Rituals turn passive attention into repeatable culture — a strong community does not only post when the chart moves, it posts because the brand gives it reasons to.

RITUAL	WHAT IT IS
Feeding the Void	Members offer screenshots, bad trades, FUD posts and paper-hand confessions to Sachi. Humour, engagement and shared market therapy.
Void Checks	Late-night check-ins for the traders still awake — recurring posts across X, Telegram and Discord.
Daily Sacrifice	The community 'sacrifices' fear, doubt and weak conviction to the Dark Cat. Daily engagement fuel.
Meme Altar	A dedicated space for memes, posters, GIFs and edits. The best work gets reposted by official channels.
Chart Watch	Live market commentary, chart screenshots and Sachi-style captions.
Sachi Cam · 3:33 AM	The nightly ritual post. If you are still watching the chart, Sachi sees you.
Guardians of the Void	A community identity and role system for active members, meme creators and contributors.

Governance, kept light

Dark Sachi governance stays lightweight and practical. No heavy DAO machinery — simple community signalling on the things holders should influence: which shelters to support, which competitions to run, which art drops to prioritise, which rituals become official, which collaborations to pursue. Outcomes are published; community input stays separate from legal and operational responsibility; and token ownership never implies legal ownership of the project.

CRYP2NOVA

Archived copy · cryp2nova.com

SECTION 11

The Stray Sachi Fund

The Stray Sachi Fund is Dark Sachi's charitable angle: a best-effort initiative intended to support stray, abandoned and shelter cats through transparent, community-driven activity. It connects the project's black-cat mythology to real-world care, and it should be operated with humility and plain reporting.

Operating principles

- Transparent wallet model — any fund wallet should be publicly visible where possible.
- Proof, not promises — every charity action gets a public artifact: transaction link, partner confirmation, photo or video.
- Clear donation reporting — amounts, recipients, transaction hashes and confirmations published.
- Community participation — members may vote on shelters, regions or rescue targets.
- No exaggerated claims — impact is never stated before it is documented.

Structure: partner first, entity later

Formal charity infrastructure takes months; the community should be able to see impact in weeks. The intended approach is therefore two-track: route early donations through an established, registered animal-welfare organisation that can issue receipts, while working in parallel toward a dedicated non-profit entity (an Israeli Amuta) that could hold the charity work under its own legal identity. No entity is registered and no partnership is confirmed until it is publicly announced with documentation.

CHARITY DISCLAIMER

The Stray Sachi Fund is transparency-focused and best-effort. No donation amount, percentage of supply, revenue share, recurring contribution, shelter partnership or tax status is promised or guaranteed by this document. Nothing here should be read as a statement that a registered charitable entity currently exists. Any formal structure, partnership or charitable status will be announced separately, with documentation, only once it is real.

EXAMPLE REPORTING FORMAT

Reporting period · wallet balance before and after · donation amount · token or currency used · recipient shelter or rescue group · transaction hash · confirmation or receipt · photos or notes where the recipient gives permission.

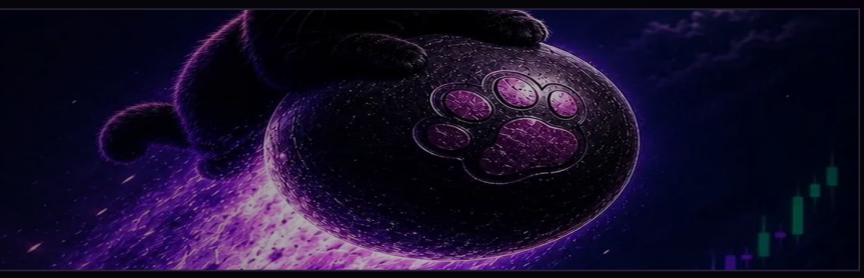

Archived copy · cryp2nova.com

SECTION 12

Trust, Safety & Official Links

PART IV · TRUST & RISK

The void does not blink.

Memecoin ecosystems move quickly and impersonation is constant. Dark Sachi's safety posture is simple: one contract address, one set of official channels, published everywhere, repeated often.

- Display the official contract address prominently on the website and in channel pins.
- Verify the CA before every transaction — no exceptions, even for links from friends.
- Official accounts do not send unsolicited direct messages, seed phrases requests, or 'claim' links.
- Wallet addresses are published only through official channels, including the registry in Section 06.
- If something looks off, check the official site before you click, sign or transact.

OFFICIAL CHANNEL	VERIFIED LINK
Contract address (Solana)	CXpnmmiRH7QRN5nKJciuf7FNyYwd7H59mwDjkmD6pump

SECTION 13

Risk Factors

Participation in $DSACHI involves significant risk. Read this section before doing anything else.

RISK	DESCRIPTION
Market risk	$DSACHI is a memecoin. Price may be extremely volatile and driven by liquidity, sentiment, attention and broader crypto risk appetite. It can go to zero.
Liquidity risk	Liquidity may be limited at times. You may be unable to buy or sell at expected prices, or at all.
Concentration risk	A disclosed registry of 24 historically linked wallets holds approximately 37.16% of total supply as of the snapshot in Section 06. Concentrated holdings can affect price stability, and any future movement or sale from these wallets — even if disclosed in advance — may impact the market. Disclosure reduces information asymmetry; it does not eliminate the risk.
On-chain data risk	Balances and labels are point-in-time. Wallets transact, and the registry can change between publications. Always re-verify on a block explorer or the live transparency page.
Smart contract & platform risk	$DSACHI operates within the Solana ecosystem alongside third-party trading and launch infrastructure. Technical issues, congestion, platform changes or third-party failures may affect trading.
Regulatory risk	Digital assets are subject to changing laws, rules and interpretations across jurisdictions. You are responsible for understanding the rules that apply to you.
Operational & execution risk	The project depends on community coordination, communications and ongoing execution. Roadmap items may be delayed, changed or abandoned.
Charity execution risk	The Stray Sachi Fund is best-effort. Donation execution depends on wallet management, recipient availability, community decisions, compliance considerations and reporting. No specific donation outcome is guaranteed.
Impersonation risk	Fake tokens, fake groups and fake support accounts are common. Verify the contract address and official links every time.

SECTION 14

Disclaimers & Conclusion

Disclaimers

This document is provided for informational and community purposes only. It is not an offer to sell securities, a solicitation to purchase securities, investment advice, legal advice, tax advice, or a promise of future value. $DSACHI is a memecoin. It carries no guarantee of price appreciation, yield, income, redemption value or profit, and should be understood as a high-risk, speculative digital asset. Participate responsibly and only with funds you can afford to lose entirely.

The wallet balances disclosed in Section 06 reflect a point-in-time snapshot of public Solana blockchain data. They may change after publication as wallets transact. The live transparency page takes precedence over this PDF. The reduction plan in Section 07 is aspirational, subject to change, and not a binding commitment to any specific timeline, lock mechanism or outcome.

The roadmap in Sections 08 and 09 describes planned community objectives, not guaranteed deliverables. No exchange listing, partnership, collaboration, bridge, audit, game release, legal entity, charitable status or donation outcome described in this document is confirmed, agreed or guaranteed. Any forward-looking statement is aspirational and subject to change without notice.

Charity efforts described here are transparency-focused and best-effort unless and until a formal structure is separately announced with documentation. Nothing in this document creates a legal obligation, fiduciary duty, or enforceable commitment of any kind. Conduct your own research, verify every official link, and make your own decisions.

Conclusion

Dark Sachi is built to be more than a ticker: a visual world, a character, a voice, a ritual system, and a crypto-native meme brand made for the night shift of the market. Version 2.1 keeps the promise that made version 2.0 matter — the registry stays public, the numbers stay current, and the plan is written down where anyone can hold it up against what actually ships.

> Sachi sees the candles. Sachi hears the FUD. Sachi watches the wallets — and shows you hers first.
>
> The void does not blink.
