What is Databot?

Databot is a Web3 analytics platform that tracks alpha hunters, emerging trends, and market signals to help traders spot early opportunities.

1. **Introduction**

- What started as an experiment between two crypto-passionate friends has evolved into Databot, a powerful Web3 analytics platform designed for alpha discovery
- By tracking key influencers, emerging trends, and market signals, we provide traders with the tools they need to spot opportunities early and stay ahead of the game
- From a fully responsive dApp to Telegram bots and AI-driven reports, Databot continues to push the boundaries of social analytics

2. **Value Proposition**

CRYP2NOVA

- **AI-Powered Research** – Use the latest innovations in data engineering and AI to streamline the research process, making it easier and faster to discover upcoming and newly launched projects
- **Social Media Listening** – Track & analyze the activity of key opinion leaders
