Abstract: The Rebellion's Blueprint

$DEBT, an acronym for "Don't Ever Believe Them," is more than a memecoin; it is a decentralized cultural movement on the Solana blockchain. Launched on July 21, 2024, by founder Autopsy, its purpose is to serve as a digital symbol of defiance against a predatory global financial system built on debt. Through a combination of deflationary tokenomics, community empowerment, and a weaponized meme culture, $DEBT aims to build a self-sustaining ecosystem that rejects the status quo and champions financial sovereignty for the 99%.

The Manifesto: The Problem

The modern world is built on a lie sold to us as progress: a system of inescapable, generational debt designed to enrich the few at the expense of the many. Financial institutions forge digital chains, central banks print currency into worthlessness, and the masses are told this is the only way. This system is a prison disguised as a dream. $DEBT was created as a glitch in this machine—a crowbar

Archived copy · cryp2nova.com

to pry open the system and a testament to the power of a collective that refuses to comply. The great default is not just a market crash; it is a conscious decision to reject the terms of our enslavement.

Tokenomics: The Arsenal of the Rebellion

- **Token Name:** Debt Culture
- **Ticker:** $DEBT
- **Blockchain:** Solana
- **Initial Supply:** 1,000,000,000
- **Contract Address:** 9NQc...pump

- **Transaction Tax:** 0% Buy / 0% Sell
- **Contract:** Renounced
- **Liquidity Pool:** Burned
- **Supply:** Immutable & Deflationary

Deflationary by Design

Unlike fiat currencies which inflate into infinity, $DEBT is designed to become scarcer over time. To date, over **66 Million tokens have been permanently burned**. Future burns are planned to commemorate community-driven milestones, forever reducing the total supply.

Community-First Distribution

From its inception, $DEBT has been a project for the people. Over **100 Million tokens** have been distributed directly to community members through airdrops and events, including the "Debtmas" airdrop of 30 Million tokens to holders.

The Treasury: A War Chest for the Future

A total of **150 Million tokens** are secured in a time-locked contract set to unlock on July 21, 2026 and return to the treasury wallet (`debtculture.sol`). These funds are publicly viewable via the Vault Tracker.

Treasury deployment is governed by a long-term stewardship model designed to extend project longevity rather than accelerate dilution. Funds are intended to be used selectively for DAO-voted initiatives, ecosystem incentives, infrastructure, and strategic growth, with transparency and sustainability prioritized at every stage.

Roadmap: The Path to Victory

The journey to financial sovereignty.

Phase 1: IGNITION (Completed)

Archived copy · cryp2nova.com

- Unleash a viral meme offensive to expose the global debt system.
- Airdrop initial tokens to the first wave of believers who joined the cause.
- Ignite the burn mechanism, beginning the token's deflationary journey.
- Achieve listings on major market trackers to broadcast the signal worldwide.
- Establish the digital command center with the launch of DebtCulture.xyz and core social channels.

Phase 2: ESCALATION (Current)

- Forge alliances with projects and platforms aligned with DEBT's anti-establishment ethos.
- Release official DEBT merchandise, extending the culture beyond the digital realm.
- Launch the official DEBT NFT initiative, designed to reward long-term conviction and participation.
- Execute strategic, milestone-based token burns tied to meaningful community achievements.

Phase 3: THE GREAT DEFAULT (Future)

- Deploy the DAO Treasury and governance framework, progressively decentralizing decision-making.
- Integrate $DEBT as a utility layer for access, engagement, and interactive experiences within the ecosystem.
- Expand the narrative beyond crypto through targeted cultural and digital campaigns.
- Solidify the Tokenverse, cultivating a self-sustaining economy rooted in autonomy, transparency, and resistance to debt-based systems.

Project Escalation: Cypher Syndicate

The next phase of escalation introduces **Cypher Syndicate**, an **888-piece NFT collection** built on Solana. These NFTs are not merely profile pictures. They function as loyalty artifacts, symbols of alignment, and access points within the DEBT ecosystem.

- **Utility:** Cypher Syndicate NFTs are designed to integrate directly with the DEBT token. Holders may gain access to staking mechanisms, future airdrops, gated experiences, and additional ecosystem privileges as the project evolves.
- **Distribution Strategy:**
  - **288 Airdropped / Claimable:** Reserved for loyal $DEBT holders based on undisclosed snapshot criteria.
  - **100 Presale (DEBT-only):** Available exclusively using $DEBT at a discounted rate, rewarding long-term alignment.
  - **100 Ecosystem & Growth:** Allocated for partnerships, community initiatives, and strategic distribution.
  - **400 Public Mint:** Available via public mint, priced in SOL.

Archived copy · cryp2nova.com

- **Economic Design:** Proceeds generated from the collection are intended to reinforce the broader DEBT ecosystem. Portions may be allocated toward token buybacks, burns, staking incentives, infrastructure, or future development, with execution guided by market conditions and long-term sustainability.

The Cypher Syndicate rollout is targeted for **late Q2 to early Q3 2026**, subject to execution readiness and market conditions. Timing and structure are intentionally designed to prioritize long-term supply stewardship over short-term speculation.

Disclaimer

Your participation in this project is subject to the terms below. Please read carefully.

1. For Entertainment Purposes Only

$DEBT is a memecoin with no intrinsic value or expectation of financial return. It was created as an experimental, community-driven project for entertainment. The content on this website is for informational purposes only and is **not financial, investment, or legal advice.**

2. High Risk Activity

Engaging with cryptocurrencies involves significant risk, including the potential for total loss of your funds. All participation is done **at your own risk**. We make **no guarantees** regarding the value, performance, or functionality of the $DEBT token. Always **do your own research (DYOR)**.

3. No Guarantees or Liability

The project roadmap contains forward-looking statements that are goals, **not promises**, and are subject to change. To the fullest extent permitted by law, the creators and community of Debt Culture disclaim all liability for any loss or damage arising from your use of this website or participation in the project.
