What is Definitive

Copy

The most advanced onchain trade execution platform

Overview

Definitive ↗ is the future of onchain trade execution. We deliver a CeFi-like experience on DeFi rails via a fully non-custodial platform & API that is live across Solana, Base, Robinhood Chain, HyperEVM and all other major EVM chains.

With Definitive, **anyone** - from a retail user, to a whale, to a liquid fund, or even an AI agent - can trade **any asset on any chain** with the same **institutional-grade execution** found in CeFi. Some features include:

- **Advanced order types** (TWAPs, Limits, Stops/Take Profit) you rarely see in DeFi.
- **Aggregated liquidity** across 200+ DEXs, onchain venues and professional market makers to deliver best-in-class execution prices.
- **Tailored analytics** like PnL and multichain portfolio analysis.
- **Institutional features** such as automated post-trade reporting, sub-accounts, role-based access control, and order flow masking.
- **Gas and chain abstraction** so traders never have to constantly sign transactions or worry about funding gas.
- **Competitive fee pricing** delivers 4x-20x cheaper fees than our closest competitors.

Why Definitive?

Definitive isn’t just another DeFi platform; it’s an end-to-end solution thoughtfully designed to give users an advantage when it comes to trading in DeFi.

Definitive's unique value add includes:

- **Non-Custodial:** Clients maintain full control over placing trade orders and withdrawals, while whitelisted Definitive "performers" manage pre-determined trading actions.
- **Automated:** Low latency engine and sophisticated TWAP, Limit and Stop order trading algorithms save traders significant time versus manual click-trading and 24/7 monitoring of market conditions.
- **Auditable:** Full activity history is verifiable onchain, with automated generation of exportable post-trade reporting for every trade.

Join thousands of other traders to get more tokens on every trade using Definitive!
