DogPad is a ecosystem of utilities for the launch and creation of new tokens on the Shibarium chain. Powered by $DOGPAD and built by our team of developers.

Read Whitepaper

Getting Started

DogPad’s liquidity was completely burnt, and ownership was renounced. There was a 13.5% vesting lock from the initial buybacks done on launch, which tokens will be used to reward our community during migration phase to Shibarium. $DOGPAD also has a 3% tax, which 1% is used to increase our Liquidity Pools and 2% belongs to marketing & development tax.

Utility Classes

DogPad team designed 6 utilities to provide all in one solution. DogPad is more than just a launchpad, it's a whole ecosystem.

Developed with

Knowledge & Experience

Nami

"We will make sure the DogPad will provide secure and stable layer 2 blockchain solutions to incoming Shibarium launch."

Talio

CEO of the project. Experienced solidity developer with an old track in crypto, building in the crypto space since 2017 & sharing shib since 2021. Connected to the SHIB community through years of dedication, now building on Shibarium through DogPad

Cole

"We've been planning DogPad since months, DogPad is more than just a launchpad, it’s a whole ecosystem."
