DUCKY

DUCKY is a fun-first Web3 puzzle game built as a Telegram Mini App, featuring an adorable duck mascot and powered by the $DUCKY token. By combining addictive gameplay, fun culture, and tokenized rewards, DUCKY creates an engaging experience for casual gamers and crypto enthusiasts alike.

Unlike complex blockchain games that require wallets and steep learning curves, DUCKY is instantly accessible—no download, no hassle. Players compete in bite-sized puzzle challenges, earn $DUCKY tokens through achievements, and customize their duck avatars with collectible skins and items. Built on the BNB Chain for fast and low-cost transactions, DUCKY brings crypto rewards to everyday entertainment inside the apps people already use.

With a fair token economy, strong community incentives, and a vision to become the leading Telegram-based GameFi experience, DUCKY is poised to take flight as the next viral mini app game in Web3.
