1. EXECUTIVE SUMMARY

The global securities market is undergoing a fundamental transformation. With over **$300 trillion in real estate**, **$100 trillion in ESG capital**, and countless private companies seeking better liquidity and accessibility, traditional financial infrastructure is failing to meet modern demands.

EDENA represents a paradigm shift in digital securities infrastructure. As a **globally integrated Security Token Offering (STO) exchange ecosystem**, we bridge the gap between real-world assets and digital finance through blockchain technology. Our platform creates an interconnected global marketplace where any asset can be tokenized, traded 24/7, and accessed by anyone starting from just **$10**.

⚠ 4. MARKET PROBLEM

The Fractured Global Securities Landscape

- **High Barriers:** Minimum investments of $100,000+ exclude 99% of potential investors.
- **Limited Hours:** Traditional markets operate only during specific local hours.
- **Geographic Limits:** Investors are typically restricted to their local jurisdictions.
- **High Costs:** Intermediary fees of 2-5% plus significant FX charges.
- **Settlement Times:** T+2 or longer settlement periods for cross-border transactions.

SETTLEMENT SPEED	T+2 Days (Traditional)
TRANSACTION FEES	Up to 5% (Cross-border)
MARKET AVAILABILITY	Limited (~6.5 hrs/day)

The Accessibility Crisis

Current financial infrastructure perpetuates market inefficiency:

- **Retail Investors:** Cannot access institutional-grade assets.
- **Private Companies:** Limited liquidity options for shareholders.
- **Emerging Markets:** Isolated from global capital flows.
- **Climate Finance:** Inaccessible to those most affected.

REAL ESTATE	$300 trillion locked in illiquid assets
CORPORATE EQUITY	Private markets remain closed to most
CARBON CREDITS	$100 billion market by 2030, restricted access
