🦝Introducing: Elderglade

Elderglade is an AI-driven retro style NFT Turn Based PvPvE extraction looter powered by blockchain.

Embark on a monumental journey in a game that merges the nostalgia of retro style with the cutting-edge innovation of AI, blockchain and NFTs. Introducing a Turn-Based Multiplayer Extraction Looter game, where strategy in PvPvE battles is not just encouraged—it's required.

Step into the Magic Realm, a place where the lines between legend and reality blur, inviting you on a heroic quest that spans both PvE and PvP strategy battles. Here, the wilderness isn't just a backdrop; it's a living, breathing kingdom where nature reigns supreme, and every corner holds a story waiting to be uncovered.

Dive deep into a fantasy world bursting with life, where you'll find more than just adventure. Reside in bustling towns, navigate through intricate forest mazes, brave the vast wilderness, and rise as the protector of a kingdom threatened by those who wish to conquer its lands.

Presented in vibrant 2D pixel-art, this browser game brings the battle for the kingdom to your fingertips. Animals of all kinds become warriors, each with their own tales of valor, as they clash against invaders in dynamic battlegrounds.
