Era Four:
▸ Vault

TIMELINE:
Q3 2026 → Q4 2026

Securing Value. Empowering Ownership.

01 — Launch privacy-native wallet: ETH testnet → mainnet → multi-chain.
02 — Integrate biometrics + stealth connectivity.
03 — Position as first stealth-native Ethereum wallet.
04 — Leverage EPN user base for rapid adoption.

Era Five:
▸ Convergence

TIMELINE:
Q4 2026 → Q1 2027

Full Enigma Ecosystem Convergence.

01 — General-availability launches: Overlay (99.9% uptime), Echo, Vault, and EPN.
02 — Unified Stealth Suite across iOS, Android, and desktop.
03 — Global go-to-market: app stores, affiliates, privacy-first resellers.
04 — Marketing push: “Messenger + Wallet + VPN + RAVID = One Invisible Network.”

Looking Ahead.

Enigma’s next phase moves beyond product launches into global adoption — expanding our stealth infrastructure across enterprise, government, and consumer networks. As RAVID matures into an open SDK and decentralized protocol, Enigma will transition from a suite of privacy tools into the backbone of a new, sovereign internet — one where presence, communication, and value exist without exposure.
