> De-centralized Currency on blockchain technology. Open Source. Community run and maintained EOST

EOS TRUST (EOST) is a de-centralized Currency on ETHEREUM NETWORK. It is Open Source. Community oriented and powered

EOS TRUST (EOST) did not conduct any ICO but seek to improve the legacy of the original EOS in creating a de-centralized currency under the ethereum network. YES! YOU CAN CALL US THE ETH VERSION OF EOS, EOS TRUST is designed to be majorly distributed to the community . more than 70% of token are to be strategically airdropped to the community.

By doing this we seek an attempt to start a movement of a crypto community that can not be controlled by major whales but each person of the community adds value to the currency.

WHAT IS EOS TRUST (EOST)?

The original EOS is a peer-to-peer cryptocurrency and open-source software project. Just like other cryptocurrencies, EOS is a global, digital payment method that uses blockchain technology to transfer and trade "coins." The Creation and transfer of coins is based on an open source cryptographic protocol and is not managed by any central authority.

WHY EOS TRUST?

Due to large and more adoption of cryptocurrency, we ran into problems like scalability. increased mining cost etc, the average block mining speed ETC. EOS TRUST makes it more possible to scale, cut cost and inherently save time on transfers under the ethereum network this inspired the creation of EOS TRUST (EOST).

Despite the challenges associated with EOS, a lot of investors still want to participate in its market. To this end, EOST is introduced as a platform for easy, fast, affordable and efficient use of EOS. The solution is centered around giving people (EOS community) the ability to comfortably use EOS through a more scalable alias – EOST.

THE SCOPE OF EOST

EOS TRUST is striving to be one of the leaders in adoption of digital currency for everyday use. We intend to simplify and bring the powerful peer-to-peer ledger system into the hands of every day people who will utilize it for everyday transactions. We regularly speak of ourselves as a community currency and enjoy the simple comments and interactions of new users to blockchain technology. We allow them to dictate how we should make things easier and more effective for their use, We desire for EOST to remain and continue as a decentralized currency for everyone.

OUR OBJECTIVE

E-MARKET INTEGRATION

EOST is looking to make cryptocurrencies easily transferable and exchangeable for purchasing power. We are in talks with various companies leading the way forward to integration with all major existing e-commerce online platforms. So our goal is to have EOST available to be used by small businesses or websites as method of payment or donation to transfer funds.

PROJECT UPGRADE

We are currently utilizing the Ethereum blockchain as we have started an ERC20 token under their system. Our total supply of tokens is 100 billion with a decimal point of 18 and our contract address is **0x87210f1d3422ba75b6c40c63c78d79324dabcd55.** The Ethereum platform is trusted and utilized by very large companies and is a very forward thinking blockchain.

We have discussed amongst developers the need to continue to evaluate the long-term durability of the ETH blockchain and if in the future we need to start our own blockchain, we have not closed the door to this possibility depending on the adoption rate of EOST.

WORLD WIDE COMMUNITY BASED

EOS TRUST has, since its foundation, been a world-wide currency. Developers from many countries, advisors, investors, innovators and volunteers on social media have been from varied parts of the world. We are excited to have team members joining from all walks of life and social status to be a part of EOST.

OUR OBJECTIVE

Continued...

USABILITY AND USER EDUCATION

EOS TRUST will make blockchain technology less daunting for the end user and give people renewed confidence in this pioneering way of transferring funds through a peer to peer digital network. Also EOS Trust understands the need to educate people on blockchain technology in a simple user-friendly fashion. This objective is close to the heart of the project in putting people and their needs first in ensuring adoption of the technology is easy and even fun.

WHY USE EOST?

Community+
Run by the community

Extremely Fast
Super speed erc20 Chain

Transparent
A blockchain you can trust

Secured
Safe Storage and Transfer of digital Assets

Inclusive
Democratic entry price, allowing everyone to participate

EOS TRUST wallet
EOST Wallet is a State-of-the-art wallet that provides various social features to increase engagement among users which improves security of the decentralized network.

ROADMAP

2ND QUARTER OF 2019-

- Addition of 1-2 smaller exchanges for more liquidity for EOS TRUST and investment potential.

3RD QUARTER OF 2019-

-Addition of 1-2 medium sized exchanges for more liquidity for EOST and investment potential (and also spur on price growth).

-Reaching out to other like-minded community focused blockchains for ways to work together

-We expect price growth over this period of time with our currency being listed on Coin Market Cap and other Coin Price listing sites.

- Continued development of native EOS TRUST (EOST) IOS and Android Wallet APP.

4TH QUARTER OF 2019-

-Addition of 1-2 medium sized exchanges for more liquidity for EOST and investment potential.

- Partnership with E-commerce integration of EOST for small businesses and online spending.

- Release of the native EOS TRUST (EOST) IOS and Android Wallet APP.

1ST QUARTER OF 2020-

- Addition of 1-2 larger exchanges for more liquidity for EOS TRUST and investment potential.
