EPIC LEAGUE

Copy

A Hub of the Finest Blockchain Games for Community

EPIC LEAGUE refers to both a blockchain-based game ecosystem and the name of its utility tokens.

Participants are both valuable game users as well as contributors in decentralized governance. Game players explore the game world we have been finely crafting, experience the gaming support provided by the platform, and collect digital assets backed by the ecosystem. And they willingly contribute to maximize the value of EPIC LEAGUE and participate in governance of systematic decisions or guidance.

EPIC LEAGUE is a virtual multiverse in which various game worlds and communities are organically connected.
