Governance & Voting

LABS provides direct on-chain governance capabilities to utility for Epicentral DAO. The DAO operates on a fully democratic basis: community members actively shape the future of the protocol by submitting proposals and casting votes on key initiatives. Members who hold and stake greater amounts of LABS tokens receive increased voting power, rewarding commitment and encouraging deeper alignment with the protocol. This structure ensures that decisions reflect the interests of the most engaged participants.

Voting Power

1 LABS Token = 1 Vote Power

LABS token holders are responsible for the following decisions:

- Determining which assets become eligible for trading on the OPX protocol
- Voting on the introduction of new features and improvements to the protocol
- Setting governance parameters and refining the operational structure of the DAO

For details about submitting governance proposals and participating in DAO decisions, see the governance page.

Parameter	Description
Jupiter Verified Yes	

Allocations

The total supply of **54,652,600 LABS** tokens is distributed across six allocation categories, each serving a specific purpose in the protocol's growth and governance structure.

Fully Circulated Date

November 26th, 2025

Allocation Category	Amount (LABS)	Vesting Status	Vesting Period	Vesting Contract
Initial Liquidity	27,326,300	Fully Distributed ✅	None	None. Liquidity was burned at launch.
DAO DeFi Incentives	10,930,520	Fully Distributed ✅	14 Months	View Contract
DAO Treasury	8,744,416	Fully Distributed ✅	13 Months	View Contract
Core Team & Early Contributors	3,279,156	Fully Distributed ✅	17 Months	Core Team Vesting Contracts
DAO Marketing	2,732,630	Fully Distributed ✅	3 Months	View Contract
DAO Contributor Bonuses	1,639,578	Fully Distributed ✅	8 Months	View Contract

DAO Contributor Bonuses

All vested allocations utilize on-chain vesting contracts, ensuring full transparency and verifiability of token release schedules. The protocol implements vesting schedules to ensure long-term alignment of stakeholder interests and prevent immediate sell-offs that could destabilize the token's value. The protocol created all vesting schedules as immutable contracts via Streamflow. The vesting contracts are immutable and cannot be modified or canceled. At the time of writing, all vesting contracts are fully distributed. The above is for information purposes only.

Security Disclaimer

The LABS token is **not** a security. The token does not grant equity, governance rights, dividends, or any claim on financial returns. LABS exists solely as a utility token within the Epicentral Labs ecosystem. It is the responsibility of all purchasers and holders to comply with applicable local regulations and to conduct appropriate due diligence prior to participating.
