Multi-Chain NFT DEX Protocol (Manta, EOS EVM, Polygon, zkSync, Arbitrum & ETH)

Gaming Assets Market Making

Revolutionizing the gaming industry, EZswap Protocol stands as the first and foremost platform, empowering games to seamlessly trade their assets through an innovative in-game LP system. With the ability to create Liquidity Pools (LPs) of NFTs and ERC-20 tokens, games can now engage in dynamic asset market-making without the burden of fixed costs. This groundbreaking approach not only controls prices effectively but also generates unparalleled network effects. Poised to attract millions of users, EZswap Protocol is set to lead the next wave in gaming trends.
