💡 Introduction

FEG Ecosystem

Overview

FEG is the core token of the FEG ecosystem. SmartDeFi™ is the platform that powers token launches, trading tools, staking, and token utility across the ecosystem.

FEG remains on BNB Chain. SmartDeFi™ expands to additional EVM-compatible chains. Ecosystem rewards flow back to FEG on BNB Chain.

For project direction and security details, see Roadmap and Security Audits.

Start here

- Learn how FEG works in About FEG token.
- Explore launch features in SmartDeFi™ Launchpad.
- Track projects and positions in FEGtrack App.

What the ecosystem includes

FEG token

FEG is the value and rewards layer of the ecosystem. Holders can access features such as asset-backing, SmartLending, and staking through the wider SmartDeFi™ platform.

Go deeper in About FEG token and FEG Tokenomics.

SmartDeFi™ Launchpad

SmartDeFi™ Launchpad lets teams create and launch tokens with built-in utility. Core features include:

- Multi-asset backing
- Interest-free lending
- Adjustable tokenomics with a security delay
- Optional staking
- Multiple launch models, including tokenless presales, bonding curve launches, and private liquidity

See SmartDeFi™ Launchpad for the full feature set.

Real-World Assets

SmartDeFi™ supports real-world asset tokenization. Projects can connect off-chain value to on-chain ownership and distribute rewards through the staking system.

Read more in Real-World Assets (RWA).

FEGtrack

The FEGtrack app gives investors a mobile view of SmartDeFi™ projects. It covers project data, charts, market activity, news, and position tracking.

See FEGtrack App for more.

Trading and charting

SmartDeFi™ provides trading and charting for launched tokens. Trading currently routes through PancakeSwap. More integrations can follow as chain support expands.

Open the platform at SmartDeFi.com↗.
