Lending Products

Products	What It Does	Who It's For
CDP Market (feUSD)	Deposit collateral → mint feUSD -> swap into another asset for leverage.	Traders seeking high-LTV leverage and cheap borrow costs.
Vanilla Markets	Variable-rate lending pools. Borrow asset-native tokens (e.g., HYPE, HUSD, USDC) or supply them to earn APY.	Users who prefer direct exposure to the asset they borrow/lend—no redemption mechanics, fully dynamic rates.
