Introduction

Flash Technologies creates a money transfer ecosystem.

The Flash Transfer platform is the first in the world to allow you to buy cryptocurrencies with cash, transfer or sell cryptocurrencies for cash via our merchant network, with reasonable fees. Flash Wallet, our non-custodial wallet, features a smart contract that you can use to transfer your cryptocurrencies in the event of your death. Find the best fees with Flash Dex, our swap and bridge aggregator!

1/3

In a few words

Flash technologies creates a **money transfer ecosystem** and aims to help users **exchange cash for crypto-currencies.**

At the moment, the most popular method is to send your crypto-currency to the exchanges, convert it into fiat currency, then send it to your bank account for cash withdrawal.

With our project, **we're doing away with all these steps** and making the process easier.

Numerous flash partners, currently being negotiated (small businesses), **will exchange your crypto-currencies directly for cash.** For every flash user, **it will be possible to exchange cash for crypto-currency.**

You'll be able to **send crypto-coins** (redeemable for cash), **directly to another person** (who will have to collect it from a flash partner) anywhere in the world.

Some flash recharges will be available from our partners to fund your flash account immediately on the website without any intermediary (the equivalent of an amazon card, paysafecard...).

Your anonymity will be preserved in accordance with local regulations.

You can store your crypto-currencies in your website's wallet, creating a dex, staking, wallet, launchpad, audit, bridge, etc. You can pay with flash immediately on online stores.

Services

Flash Technologies offers a solution based on blockchain technology to meet these challenges. Our platform offers the following functionalities:

Flash Wallet

Flash Technologies has developed a fully integrated cryptocurrency wallet that holders and merchants can use to buy, sell, bet, earn rewards and browse the Internet.

Flash Staking

Customers and merchants can earn rewards by using our Staking protocol. Each month, Stakers receive a % of our Staking pool.

CRYP2NOVA

Flash Dead

The “dead wallet” function. This function allows cryptocurrencies to be recovered in another wallet in the event of loss of the recovery phrase and/or death of the cryptocurrency holder.

Flash Launchpad

Flash Launch is our launch pad for upcoming IDO(s) and enables crypto projects to create their tokens on multiple blockchains like and raise funds during pre-sales or fair launches.

Archived copy · cryp2nova.com

Flash Transfer

Exchange crypto-currencies for currency or **buy crypto-currencies directly with cash through** approved partners.

Ability to send funds to a recipient who can withdraw them either in fiat currency or cash anywhere in the world

But also using a **non-custodial wallet like Flash Wallet.**

"Financial freedom is great, but having it everywhere in the world is better"

Archived copy · cryp2nova.com

Volatility

How can I guarantee customers that the price will be stable for exchanges on the site?

When the user **a transfer on the site, it will automatically be exchanged into stablecoin ($, €...)** The price will therefore remain stable.

Flash Dex

A tool for **accessing as much crypto and blockchain as possible.**

This swap & bridge system has been designed to **take advantage of the entire ecosystem without being limited** to the frontier of a blockchain, thanks to our aggregator which searches for the best fees from all dex partners.

"Like Flash Transfer, which transcends the idea of borders, Flash Bridge also breaks through the limits imposed by blockchain in DeFi".

Flash Recharge

The Flash Recharge prepaid card represents an innovative solution for users wishing to fund their cryptocurrency accounts directly. This method makes it possible to credit digital assets such as Ether (ETH), BNB, directly to the Flash Wallet. The major advantage of this card is the elimination of any intermediary intervention, offering a simplified and straightforward top-up process.

- Flash recharge allows users to credit their crypto to their Flash Wallet.
- Flash recharge cards will be printed at the time of purchase as part of an eco-responsible approach.

Flash Dead

The “Flash Dead” feature in Flash Wallet protects cryptocurrencies in the event of loss of the recovery phrase or death of the holder.

With a subscription of $4.99 per month or $49.99 per year, beneficiaries can claim funds in the event of death.

The subscription also includes bonus points for referrals and other actions while subscribed.

The fully decentralized smart contract ensures that no one except designated beneficiaries has access to your funds.

You can also cancel or postpone the timer at any time.

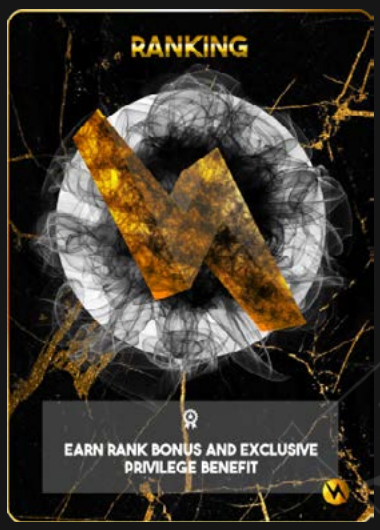

Even if the subscription expires, the inheritance contract remains active until its term, ensuring that estate arrangements are maintained.

Integrated directly into Flash Wallet, this feature facilitates digital asset management while offering rewards, priority technical support, and ongoing protection.

Tokenomics

Flash is a cross-chain Token that aims to become a medium of exchange within the Flash Technologies ecosystem, which includes services such as Flash-transfer, Flash-Wallet and more, so that regular users are not exposed to high transaction fees. One of Flash's main objectives is to offer holders the possibility of exchanging at lower cost. In addition, it will offer various benefits depending on the number of Tokens held by the user.
