DOCUMENTATION

FUNDED by FOXIFY

The first A-book prop firm infrastructure layer built for trading platforms. Real capital. Real orderbooks. Instant cashouts.

Get FUNDED Now | Explore Platforms →

GENERAL

01 Overview

FOXIFY built FUNDED — the first A-book prop firm infrastructure layer built for trading platforms. FUNDED is already live on Kodiak, PERPTools and What Exchange — with full integration across all leading trading platforms like HyperLiquid & more targeted within the next 12 months.

For Traders

FUNDED removes the biggest barrier — capital. No KYC, no evaluation phases, and you keep 80% of the profits generated.

- Deposit as little as $100 and get instant FUNDED accounts
- Scale up to $20,000 in FUNDED capital
- Keep 80% of profits — instant on-chain cashouts in USDC
- No KYC, no evaluation phases
- Real capital on real orderbooks — no synthetic/demo accounts
- No restrictive trading rules

CRYP2NOVA

Archived copy · cryp2nova.com

125+ markets: crypto, forex, stocks, metals, commodities, and indices

For Platforms

FUNDED is a plug-in prop trading layer that drives volume, retention, and LTV — without building anything from scratch.

- Up to 100x more trading volume from the same user base
- 3x better user retention and 15x–60x higher LTV
- Every trade routed through real orderbooks — strengthens liquidity, never extracts it
- Plug-in layer — no need to build prop trading infrastructure from scratch
- Unique proposition that makes user acquisition significantly easier

FUNDED vs Traditional Prop Firms

FEATURE	FUNDED	TRADITIONAL
Evaluation	**None — instant funding**	1–3 months of evaluation phases
Capital	**Real capital, real orderbooks**	Synthetic / demo accounts
Order Routing	**A-book — every trade on real orderbooks**	B-book — trades routed away from orderbook
Cashout	**Instant on-chain in USDC**	Weeks of manual review
KYC	**None required**	Full KYC / ID verification
Platform Liquidity	**Restores and strengthens liquidity**	Extracts liquidity from the platform
Transparency	**100% on-chain verifiable**	Black box operations

04 How It Works

Getting started with FUNDED is straightforward. Four steps from deposit to profit withdrawal.

1. **Choose Your Platform**
   Pick your preferred DEX from the supported list

2. **Choose Your Account**
   Entry ($100 → $500), Pro ($500 → $2,500), or Elite ($500 → $5,000)

3. **Trade & Hit Milestones**
   Earn points through trading activity + P&L performance. Scale up through levels.

4. **Scale, Earn & Withdraw**
   Cash out 80% of profits instantly on-chain. Scale up to $20,000 FUNDED.

05 Tradeable Markets

FUNDED gives you access to 125+ markets across crypto, forex, stocks, metals, commodities, and indices. Trade on real orderbooks.

Archived copy · cryp2nova.com

06 USDC Onramp & Chains

To deposit into your FUNDED account, you need USDC on the correct chain for your chosen platform. Make sure you bridge or purchase USDC on the right chain before depositing.

How to Onramp USDC

Archived copy · cryp2nova.com

1. Purchase USDC

Buy USDC from a centralized exchange (Coinbase, Binance, Kraken) or buy USDC on Metamask using Transak/MoonPay

2. Withdraw to your Web3 Wallet

Send USDC to your Web3 wallet (like Metamask, Rabby, Trust Wallet, etc) on the correct chain for the platform of your choice

3. Bridge (if required)

Use this **bridge** to move your USDC to the right chain

4. Deposit & Trade

Connect your wallet to the platform of choice and start your FUNDED journey

what.exchange USDC on Arbitrum + arbETH for gas	Trade/Get FUNDED

$500 deposit becomes $5,000 FUNDED instantly

$20K Cap

Highest funding tier available across all tracks

Tighter Risk

Lower drawdowns reward disciplined execution

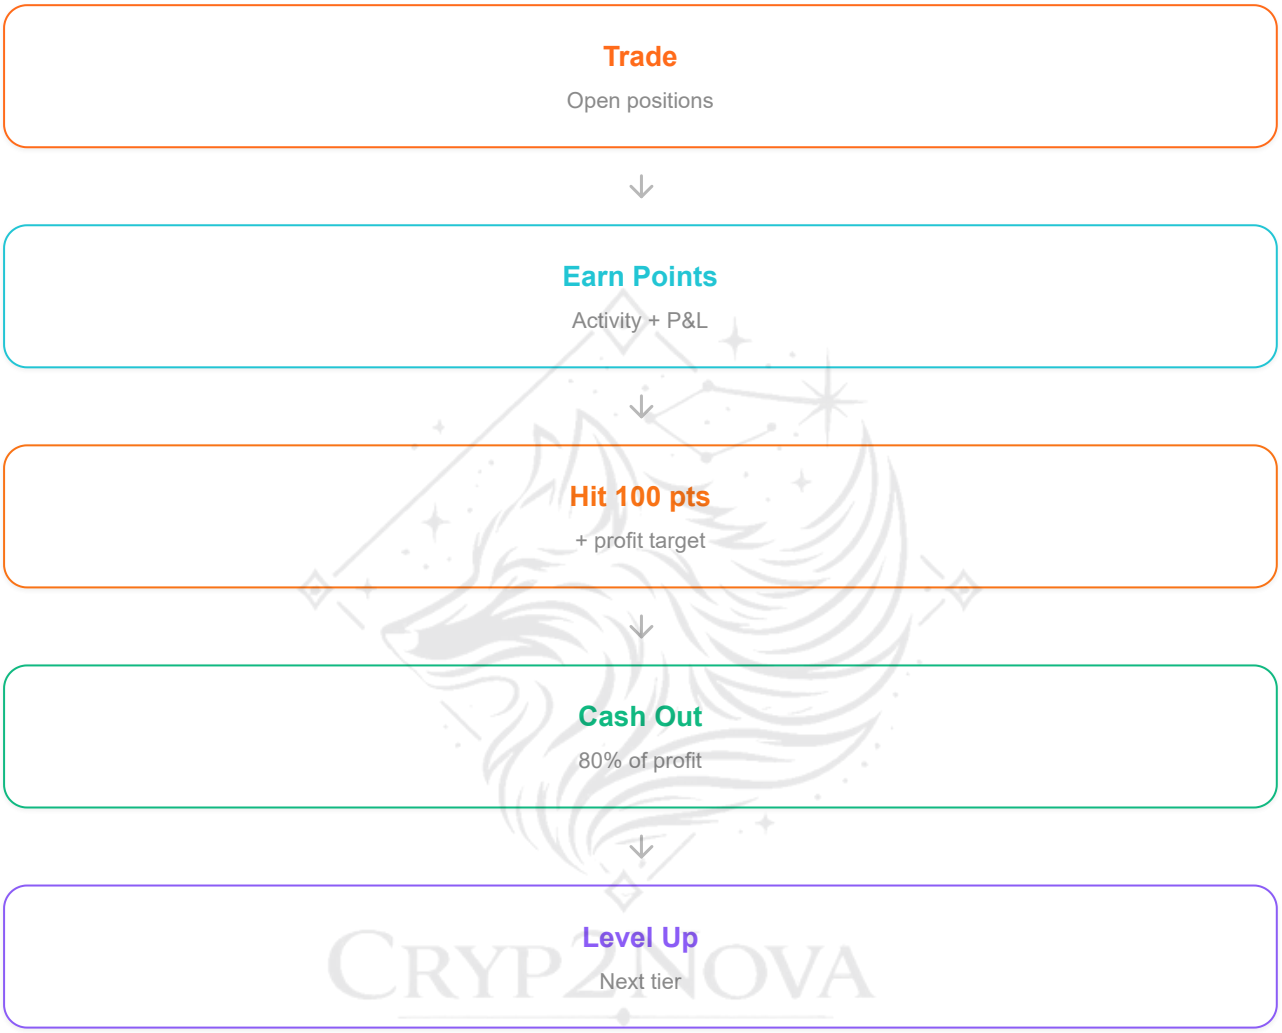

RULES & MECHANICS

Archived copy · cryp2nova.com

11 Points & Promotion System

No minimum trading time — promotion is purely performance-based. Hit your targets and scale up instantly.

Promotion Flow

Activity + P&L

Points are earned through trading activity over time combined with P&L performance.

Minimum P&L Threshold

+15% of original balance before promotion is possible.

Archived copy · cryp2nova.com

RAPID Promotion

Exceeding P&L target earns points exponentially; losses reduce points.

Instant Cashout

Once points target is exceeded, instant cashout of 80% profit, then move to next level.

12 Drawdown Rules

Each level has a max drawdown limit, calculated from the initial funded balance.

Max Drawdown

Total loss limit from your starting balance. Hit this and the account is liquidated.

Everything Else

No other restrictions can end your challenge. Keep trading within limits.

What Can End Your Challenge?

Max Drawdown Hit

Account is liquidated. Losses deducted from your collateral first, then remaining covered by FUNDED vault.

17 Automated FUNDED Accounts BETA

AI-driven FUNDED accounts that follow curated trading strategies on the trader's behalf. They use the same deposit, scaling, drawdown, and NFT mechanics as a standard FUNDED account, with a fully hands-free experience. The strategy opens positions, hits profit targets, cashes out the trader's share automatically, and scales the account through each level.

How It Works

AI-Driven Execution

Curated trading strategies run automatically on funded capital. Open positions and executed trades are visible in the dashboard at any time. Manual trading and strategy building are not required.

Same Core Mechanics

Deposit, scaling, drawdown limits, and NFT bonuses work exactly like standard FUNDED accounts.

Auto Cashout and Scale

When the account hits its profit target, profits cash out to the trader's wallet and the account scales up to the next level automatically.

Growing Drawdown Buffer

As the account scales through levels, the dollar value of allowed drawdown grows well above the initial deposit. Larger buffer, larger position sizes at each tier.

CRYP2NOVA

Fully Hands-Free

No trading experience required. Deposit, activate, and monitor performance from the dashboard while the strategy executes.

✓ Automation Encouraged

Most prop firms ban bots, EAs, and automated strategies. These firms operate on a B-book model and profit when traders lose, so automation is restricted to protect firm P&L. FUNDED runs on an A-book model, where FOXIFY earns from fees on real market execution rather than from trader losses. Automated trading is welcomed rather than restricted.

Archived copy · cryp2nova.com

Available Tracks

Only Entry and Pro automated accounts are available during Beta. Elite automation is in development.

Entry
AVAILABLE NOW

Pro
AVAILABLE NOW

Elite
COMING SOON

Profit Share: 70% / 30%

Automated FUNDED accounts return **70% of profits to the user** and 30% to the protocol. This covers strategy curation, execution infrastructure, and ongoing R&D. Standard FUNDED accounts remain at 80% / 20%.

Coming Soon

Join Waitlist →

TRANSPARENCY

18 A-Book vs B-Book

Unlike the majority of prop firms which operate B-book and route trades away from the orderbook, FUNDED routes every trade through real orderbooks — restoring and strengthening platform liquidity rather than extracting it. This is the fundamental difference that makes FUNDED a net positive for trading platforms.

Archived copy · cryp2nova.com

A-Book (FOXIFY)

- Every trade routed through real orderbooks — restores and strengthens platform liquidity
- FOXIFY profits from fees and revenue share, not trader losses/deposits
- Since profits are derived from real trades, profits are automatically shared when the user requests payout
- No incentive to manipulate prices or outcomes
- Complete transparency — every trade verifiable on-chain
- Drives up to 100x more volume, 3x better retention, and 15x–60x higher LTV for platforms
- Aligned interests: your success is FOXIFY's success

B-Book (Traditional)

- The firm takes the opposite side of your trade
- Firm profits when traders lose — conflict of interest
- Trades routed away from the orderbook — extracts platform liquidity
- Price feeds can be manipulated
- Payouts can be delayed or denied
- Opaque operations — no way to verify execution
- Synthetic/demo environments that do not reflect real markets
- Prop firms depend entirely on users' evaluation fees to pay other users' profit payouts

Cryp2Nova

19 On-Chain Transparency

Every aspect of FUNDED operates on-chain. This is not a marketing claim — it is a verifiable technical reality. No black boxes. No hidden operations.

Every Trade Verifiable

All trades are executed on-chain through real DEX orderbooks. Anyone can verify any trade, any time.

Archived copy · cryp2nova.com

Smart Contract Payouts

Cashouts are automated via smart contracts. No human can block, delay, or deny a valid payout.

Auditable P&L

Your profit and loss is recorded on-chain. No discrepancies between what you see and what happened.

Transparent Operations

Complete visibility into how the platform works. No opaque logic, no hidden mechanics.

CRYP2NOVA

REFERENCE

20 Definitions

FUNDED Account

A trading account funded with capital from the FOXIFY vault, accessible after depositing collateral.

Collateral

The USDC deposit made by the trader to activate a FUNDED account. Acts as risk buffer.

Max Drawdown

The maximum percentage loss allowed on a FUNDED account before liquidation. Calculated from the initial funded balance.

Profit Target

The minimum profit in USD that must be achieved at each level before promotion is possible.

Archived copy · cryp2nova.com

Points Target

Activity-based score (100 points per level) earned through trading volume and P&L performance.

Promotion

Advancement to the next funding level after meeting both the points target and profit target.

A-Book Model

A model where the platform routes trades to real markets. FOXIFY profits from fees, not trader losses.

B-Book Model

Your trades are not routed to the live, external market. Instead, they are managed internally within the firm's simulated system. Not used by FOXIFY.

DEX

Decentralized Exchange. A non-custodial exchange where trades settle on-chain.

Perpetuals (Perps)

Derivative contracts with no expiry date, allowing long or short positions with leverage.

Liquidation

Forced closure of positions when drawdown limits are breached.

USDC

USD Coin. A stablecoin pegged 1:1 to the US dollar. All FUNDED deposits and payouts are in USDC.

CRYP2NOVA

21 Risk Acknowledgement

⚠ Important Risk Disclosures

Trading perpetual futures and leveraged products carries a high level of risk. It is possible to lose all of your deposited collateral. You should only trade with funds you can afford to lose.

FUNDED accounts operate on real DEX orderbooks with real capital. While FOXIFY provides the funded capital, your deposited collateral is at risk. Losses are first deducted from your collateral before the FUNDED vault covers remaining losses.

Archived copy · cryp2nova.com

Past performance is not indicative of future results. Market conditions can change rapidly, and leverage amplifies both profits and losses. There is no guarantee of profitability.

By using FUNDED, you acknowledge and accept:

- You may lose your entire deposited collateral
- Leveraged trading is inherently risky
- Smart contract risk exists, even with audited contracts
- Network congestion or outages may affect trade execution
- Oracle or price feed delays may affect liquidation timing

FOXIFY is not a financial advisor. Nothing in this documentation constitutes financial, investment, or trading advice.

22 Trading Fees

Transparent fee structure with proceeds feeding back into the FOX ecosystem.

Trading Fees: 7.5bps (0.075%) for FUNDED on FOXIFY, Kodiak Finance, What Exchange. 9bps (0.09%) for FUNDED on PerpTools.

Fee Allocation: 30% of the fees is used to buy $FOX and is distributed to users that have staked $FOX tokens.

FUNDING Fee: Dynamic. Subject to the underlying asset & platform where FUNDED is integrated on.
