Welcome to GBM Auctions

The Auction Protocol Where Everybody Wins

Welcome to the official wiki for GBM Auctions

In a GBM Auction, bidders earn when they get outbid.
This transforms auctions into high-engagement, high-efficiency tools for uncovering true market value and gives every participant a win-win experience.

Our incentivized bidding model introduces a powerful new price discovery primitive for DeFi, NFTs, and Real-World Assets.

Whether you're an artist, creator, founder, collector, or trader, GBM offers a new way to sell and acquire assets - one that’s fun, fair, and rewarding.

The GBM Auction protocol will enable anyone to launch their own custom-branded GBM Auction House in just a few clicks and instantly tap into a thriving community of bidders and collectors.

🔍 In this wiki, you'll find:

- What GBM is, why it matters and how a GBM Auction works
- What GBM has achieved so far, our partners, and how to join the community

Archived copy · cryp2nova.com

- A breakdown of the protocol and what you can do with it
- $GBM tokenomics, protocol reward systems, staking and governance mechanics
- Our roadmap and vision for the future of GBM
