Overview

Copy

STEPN GO is a Web3 lifestyle app featuring social and game modules. Its goal is to connect people globally. It centers on two of the most essential daily activities: staying connected with friends and family, and maintaining an active lifestyle.

Users equip themselves with NFT Sneakers, allowing them to earn Tokens and NFTs by **walking, jogging, or running outdoors.** The Tokens and NFTs can either be used within the app or sold on secondary markets freely.

STEPN GO facilitates Web3 adoption via Sneaker Lending and FSL ID — users only require an email and an Activation Code to start playing. **FSL ID aims to be the biggest Web3 Universal Login and Loyalty Program.**

NOTE: STEPN GO is currently in the testing phase. The content of this whitepaper is subject to change in the future.
