Welcome to Huebel ecosystem

Huebel Bolt ecosystem — is a meme-driven community network of influencers and blockchain enthusiasts. As one of the earliest and most established communities of builders on TON, $BOLT has become a cultural phenomenon that unites crypto enthusiasts globally. With a carefully managed token distribution and full Web3 compliance, $BOLT stands for innovation and teamwork on TON.

what is $bolt?

BOLT>TON

$BOLT is a meme token built on the TON blockchain, launched in May 2022. It became the first and most popular meme token on TON. Created by an international crypto community of enthusiasts, $BOLT was designed to mock the overly serious approach to analyzing tokens and projects in crypto.

Archived copy · cryp2nova.com

The purpose was to challenge the criteria of utility, holdings structure, and investor backing, emphasizing instead that an asset's value ultimately depends on how much people believe in its potential. $BOLT quickly fulfilled its mission, attracting the majority of active users from the TON community within its first year. Today, the BOLT ecosystem has evolved into a network of several dozen channels that actively support and promote the $BOLT movement. As a cultural and community-driven phenomenon, $BOLT continues to exemplify the power of collective belief and creativity in the blockchain space.

We've BOLTed TON community together, and here's how:

- Counter-culture NFT collection Huebel (TON Furniture) which poses a question to users: Is NFT truly art or not?
- Telegram channels and chats dedicated to memes that humorously critique TON projects and shed light on key issues.
- The meme token $BOLT can be stored, transferred, or exchanged using xRocket. It also incorporates SocialFi features, allowing commands like `+fire` to "fire" $BOLT or `+send` to send $BOLT in Telegram chats. Fun fact: xRocket is the first CEX on Telegram in the TON ecosystem.
- Swap $BOLT easily on DeDust.io, the best DEX on TON. With the largest community user base and immense community appreciation, DeDust.io stands far ahead of its competitors, leaving monopoly-driven rivals trailing behind in innovation and user satisfaction.

HISTORY OF Huebel

Let's not forget:

CRYP2NOVA

April 2022

Huebel arts was released as an NFT collection on TON

June 2022

Community decides to create a new $BOLT token to put it on wallets

July 2022

$BOLT was initially listed on BITON, the first DEX on TON. However, due to bugs in the $BOLT minter, the token proved too resource-intensive for BITON, ultimately causing the DEX to crash.

Archived copy · cryp2nova.com

Following this issue, the BITON team decided to transition to the Polygon network.

July Q2 2022

Huebel Bolt offchain metadata is being used in TEP64 on Token Data Standard in TON Repository.

November 2022

BOLT has been listed on a new TON DEX - DeDust. DeDust successfully passed our tests and now has become the most popular DEX on TON.

May 2023

$BOLT has been listed on CoinMarketCap (CMC).

June 2023

$BOLT has been listed on CoinGecko.
