Introduction to Humanity Protocol

Copy

Web3 is approaching one billion wallets created. We at Humanity Protocol (HP) are creating the world's first truly Sybil-resistant network of blockchains designed to onboard the first billion humans by protecting their digital identity.

We are developing Proof of Humanity (PoH) as a novel feature of Humanity Protocol to provide developers with unique human authentication mechanisms, and users complete ownership over data and identity.

Humanity Protocol is the open identity layer for Web3.
